She said she

-
2. 'I'll give Tom a lift to the party tonight.'
(the next day) She said she
-

Grammar: expressions of purpose

Water FAQ

Q: How long can humans survive without water?

A: Well, not for very long! Because we need water to control all of our body's functions, scientists estimate that the average person can survive for about only three or four days.

Q: How much water does the average person use per day?

A: The average UK resident uses approximately 160 litres of water per day. Not surprisingly, most of the water used is for washing and flushing the toilet!

Q: Is it best to drink pure water during high-intensity exercise?

A: Not really. When you sweat during exercise, you lose electrolytes such as calcium and potassium. If you're doing very heavy exercise and sweating a lot, it's better to drink a sports drink so that these electrolytes are replaced.

Expressions of purpose

For + gerund is used to show the purpose of something.

- ...most of the water used is for washing and flushing the toilet
- A knife is for cutting.

To + infinitive is used to express why someone did something or what result they wanted.

- ...we need water to control all of our body's functions
- The road was closed to allow the workmen access.

So + noun + clause has the same function as to, but takes a different structure.

- ...it's better to drink a sports drink so that these electrolytes are replaced
- The road was closed so that the workmen could have access.

Choose the correct options to complete the sentences.

1. We did an experiment in class **for / to** understand how water is used by plants.
2. They add a special chemical to the water in the pool to **keep / keeping** it clean.
3. Water therapy is great for **help / helping** stressed-out people to relax.
4. Water houseplants regularly **so that / in order** they don't die.
5. Some companies claim that bottled water has health benefits **for / so** they can charge a higher retail price.
6. I use tap water **to / for** refill my reusable water bottle when I go to the gym.
7. We tried to be as quiet as possible **so as / so that** not to disturb our guests

Work in pairs. Discuss the questions. Use expressions of purpose.

- Do you prefer drinking bottled water or tap water? Why?
- How many different uses for water can you think of? How many reasons can you think of for why it is important to clean up polluted lakes and rivers?

Listening: to an interview

Listen to a radio interview with a spokesperson for Water Watch. Then answer the questions.

1. What is the primary purpose of Water Watch?
2. What are two of the charity's other goals?
3. Why do many girls in Africa not have access to an education?
4. Apart from money, what else is the charity appealing for?

Listen to the interview again. Complete the notes with the numbers you hear.

1. Number of people in the world without access to clean water:
2. Amount of money needed by Water Watch:
3. Approximate number of households in the UK:
4. Minimum donation per household to reach target:

Vocabulary: environmental issues

Listen to the interview again. Complete the notes with the numbers you hear.

- | | |
|--------------------|---|
| 1. water poverty | a. the practice of keeping yourself and the things around you clean |
| 2. hygiene | b. the process of damaging water with chemicals and/or other substances |
| 3. water pollution | c. the condition of not having enough clean water for drinking, cooking or sanitation |
| 4. disease | d. a serious illness that affects people or animals |
| 5. climate change | e. large amounts of water that cover areas that were dry |
| 6. drought | f. a serious lack of food so that many people become ill or die |
| 7. famines | g. long periods with little or no rain |
| 8. floods | h. the change that affects the world's weather so that it is becoming warmer |

Work in pairs. Discuss these questions.

1. Do any of the environmental issues from the previous exercise exist in your country? If so, who should be responsible for solving the problem, and how?
2. Do you think you have a responsibility to help people in a different country? Why or why not?
