Lesson 6: Endangered animals

Name of endangered animal: _____

Animal group: _____

Habitat: _____

Diet: _____

Description: _____

Special adaptations: _____

Behaviour: _____

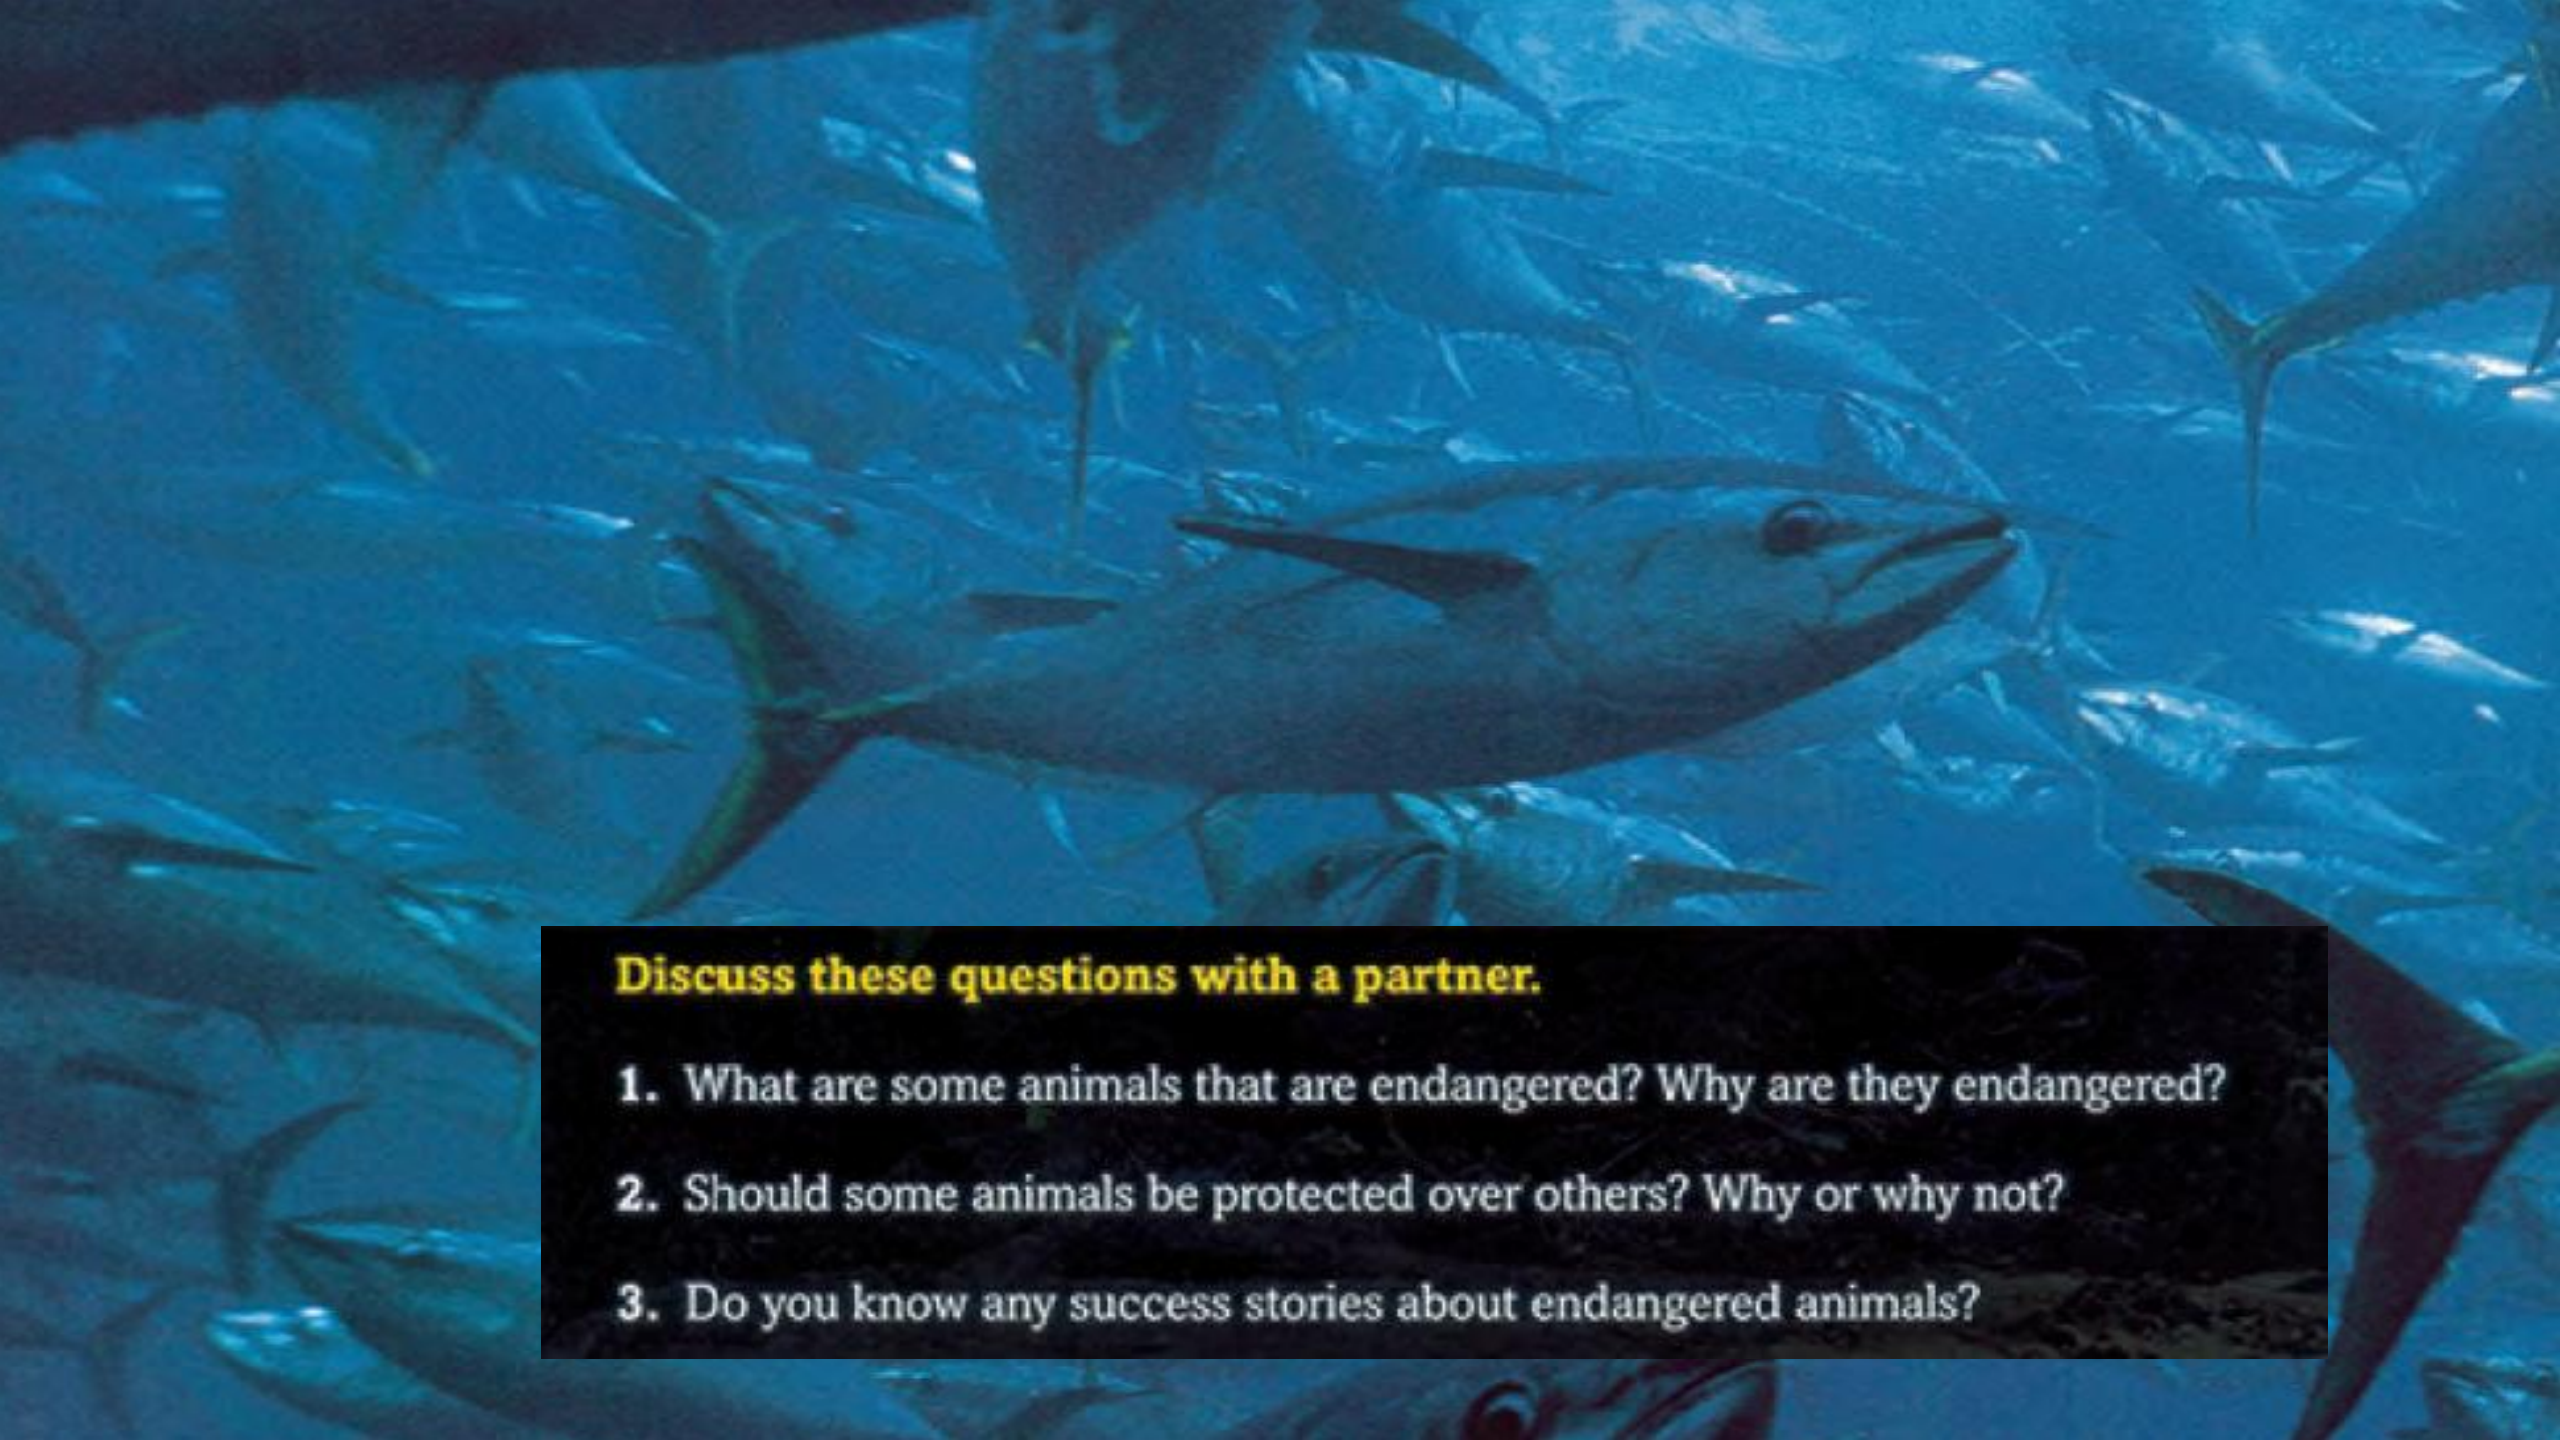

Lifespan: _____

Population today: _____

Reasons why it is endangered: _____

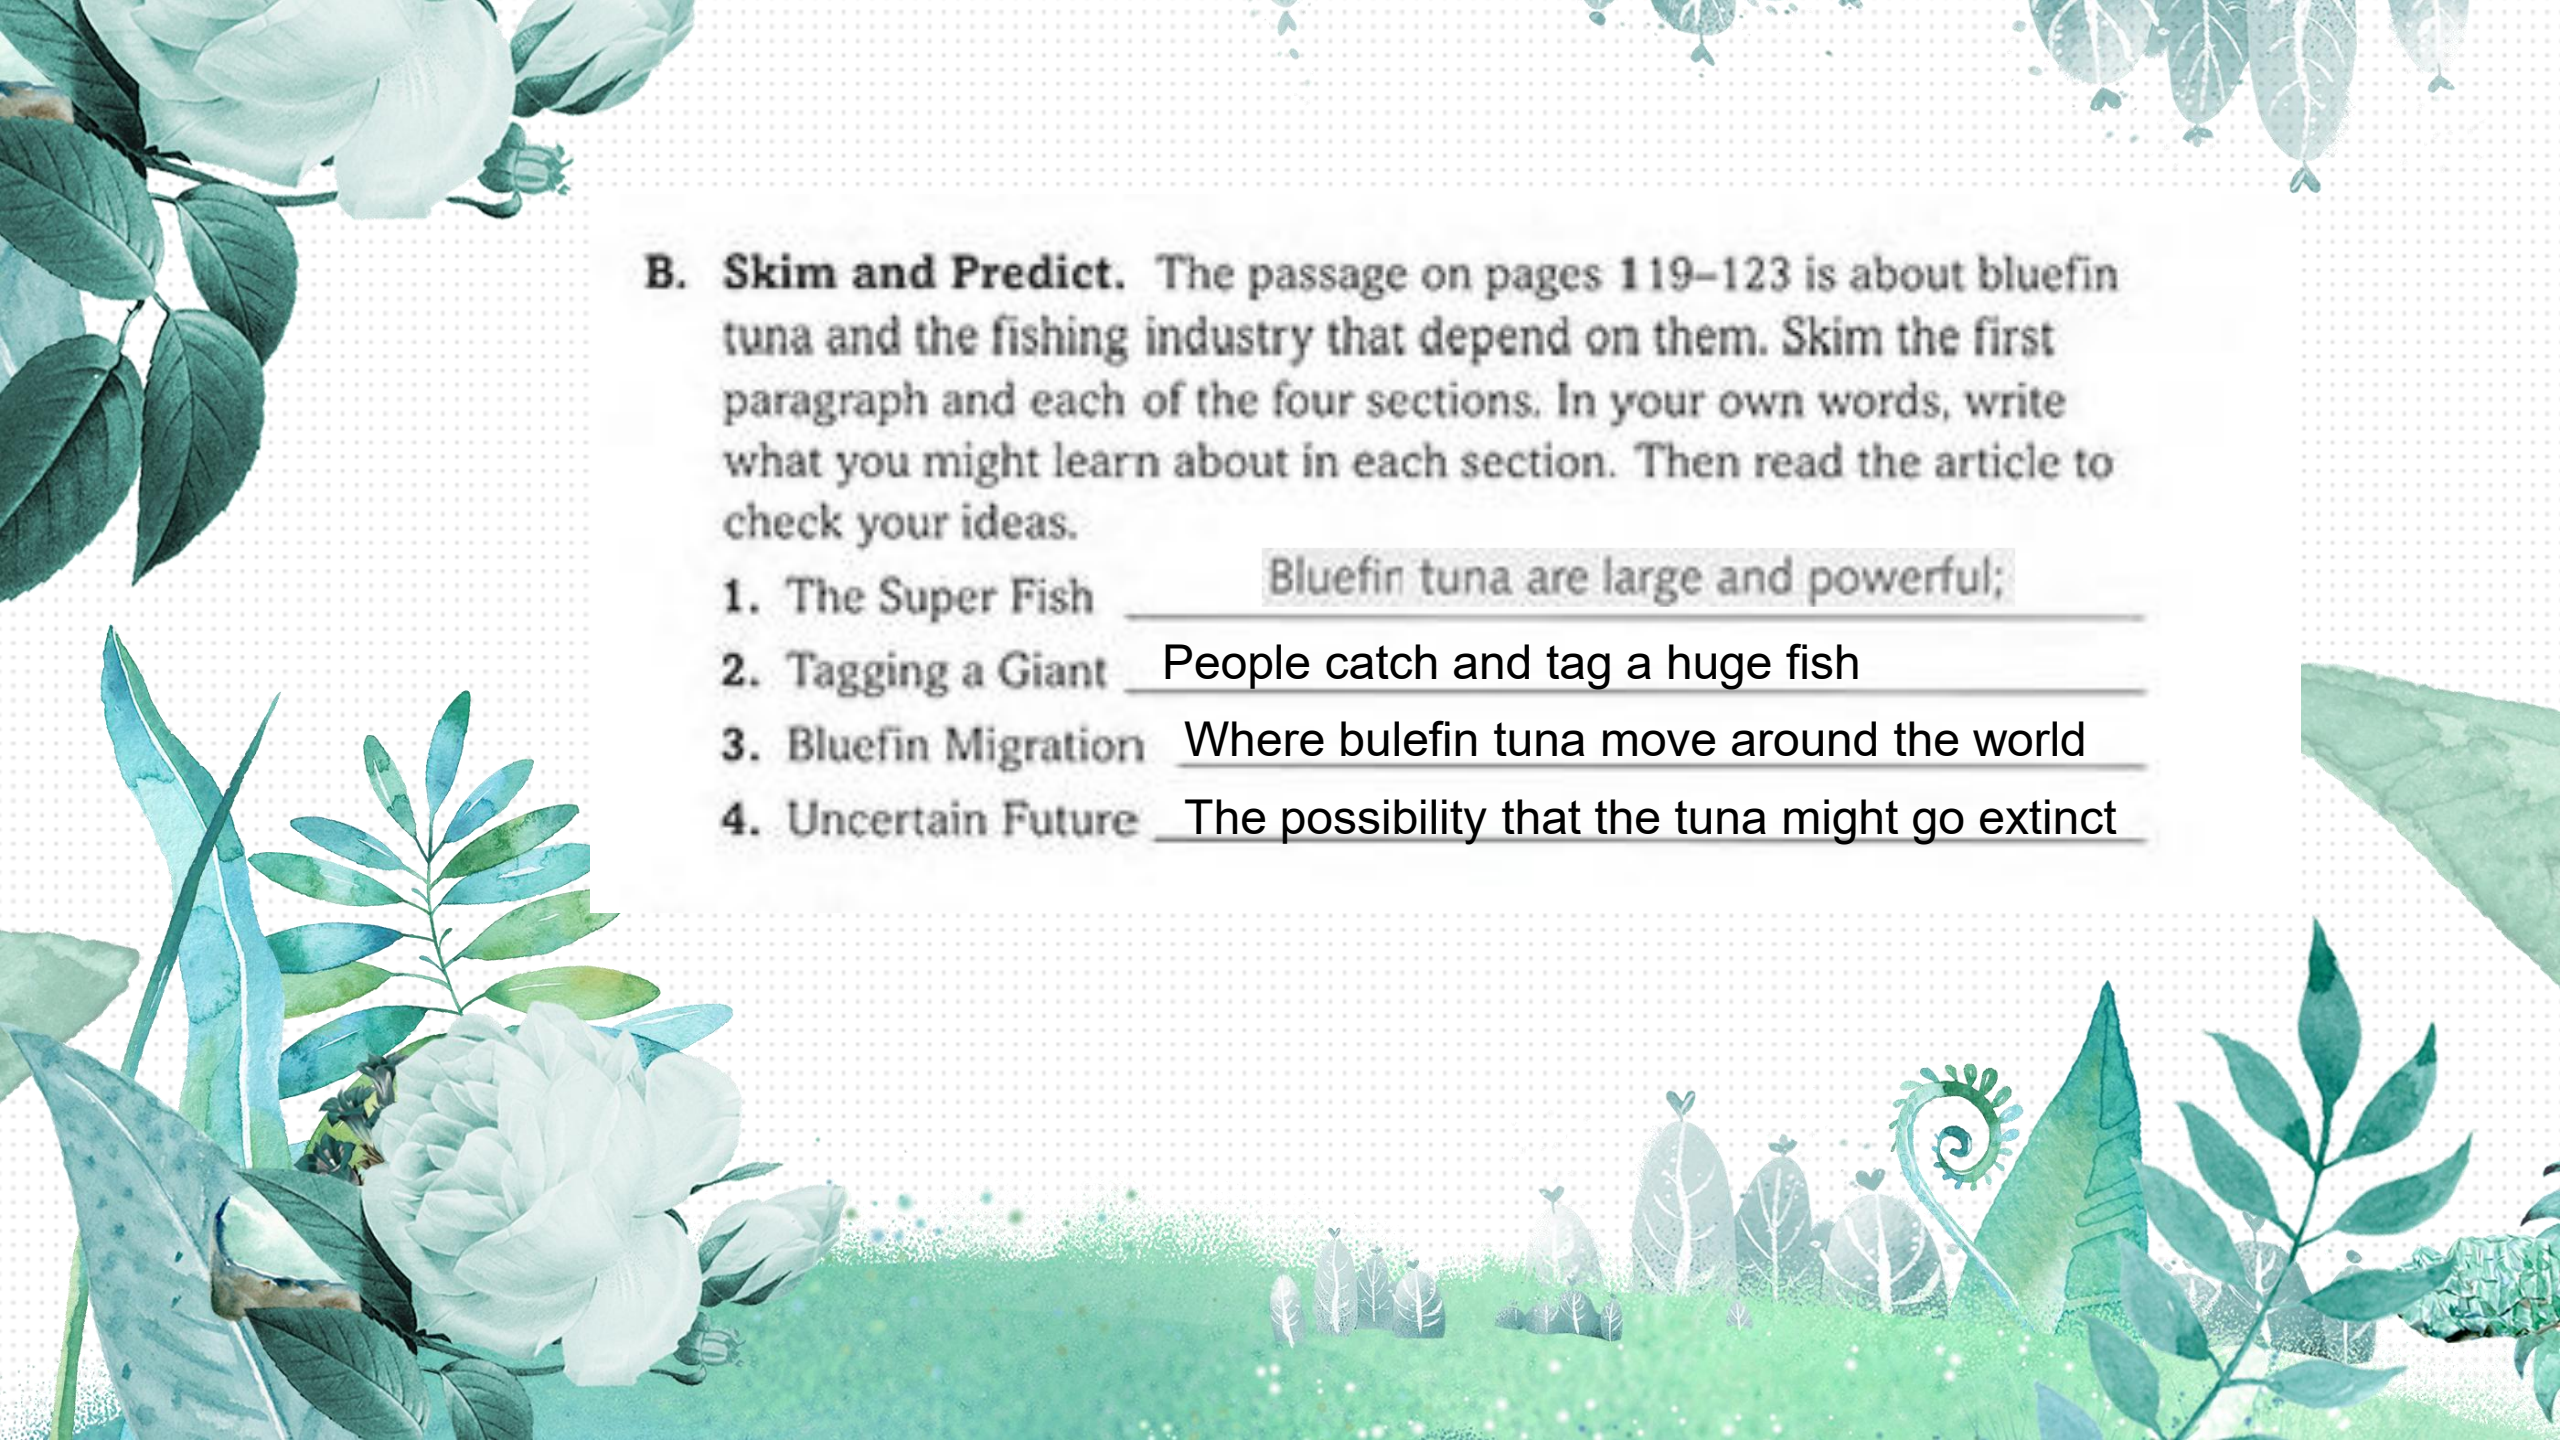

put your
picture
here

**In teams do a
small research
and then present
it to the class**

A large school of blue marlin swimming in the ocean. The fish are silvery-blue with dark stripes along their sides. They are swimming in a coordinated pattern, likely a feeding frenzy. The water is a deep blue, and the fish are densely packed in some areas.

Discuss these questions with a partner.

1. What are some animals that are endangered? Why are they endangered?
2. Should some animals be protected over others? Why or why not?
3. Do you know any success stories about endangered animals?

B. Skim and Predict. The passage on pages 119–123 is about bluefin tuna and the fishing industry that depend on them. Skim the first paragraph and each of the four sections. In your own words, write what you might learn about in each section. Then read the article to check your ideas.

1. The Super Fish Bluefin tuna are large and powerful;
2. Tagging a Giant People catch and tag a huge fish
3. Bluefin Migration Where bluefin tuna move around the world
4. Uncertain Future The possibility that the tuna might go extinct

Let's learn new words

Undulate - move or go with a smooth up-and-down motion

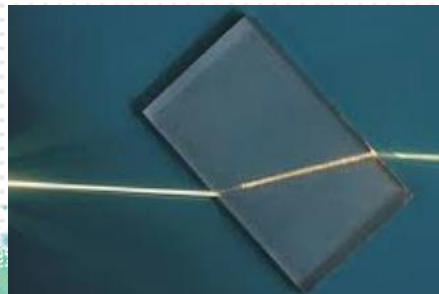

Stained glass is coloured glass used to create designs and pictures in windows

Word Link

The word root **turb** means "to spin, drive, or throw into disorder," e.g., *disturb, perturb, turbulence, turbine, turbojet.*

refract - (of water, air, or glass) make (a ray of light) change direction when it enters at an angle.

A **knot** is a unit of speed measurement for boats equivalent to 1.85 km/h

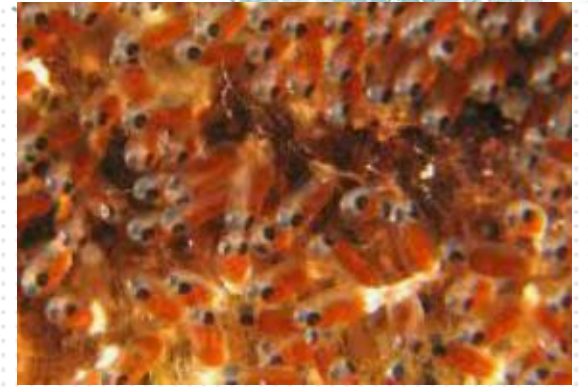

A **streamlined animal** has a shape that allows it to move smoothly through air or water

The **Iron Age** in Europe took place from around 1200 b.c.e. to 1 b.c.e.

When gosh **spawn**, they lay their eggs.

Preeminent- important

A **cannery** is a factory where food is canned

To **mingle** - mix or cause to mix together

Startling - very surprising, astonishing, or remarkable

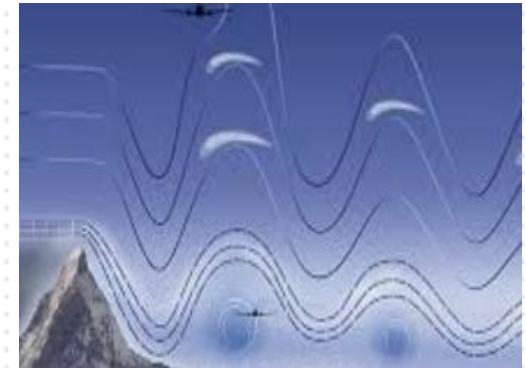

To **haul** - pull or drag with effort or force.

Gear- equipment or apparatus that is used for a particular purpose.

Turbulence- violent or unsteady movement of air or water, or of some other fluid; confusion

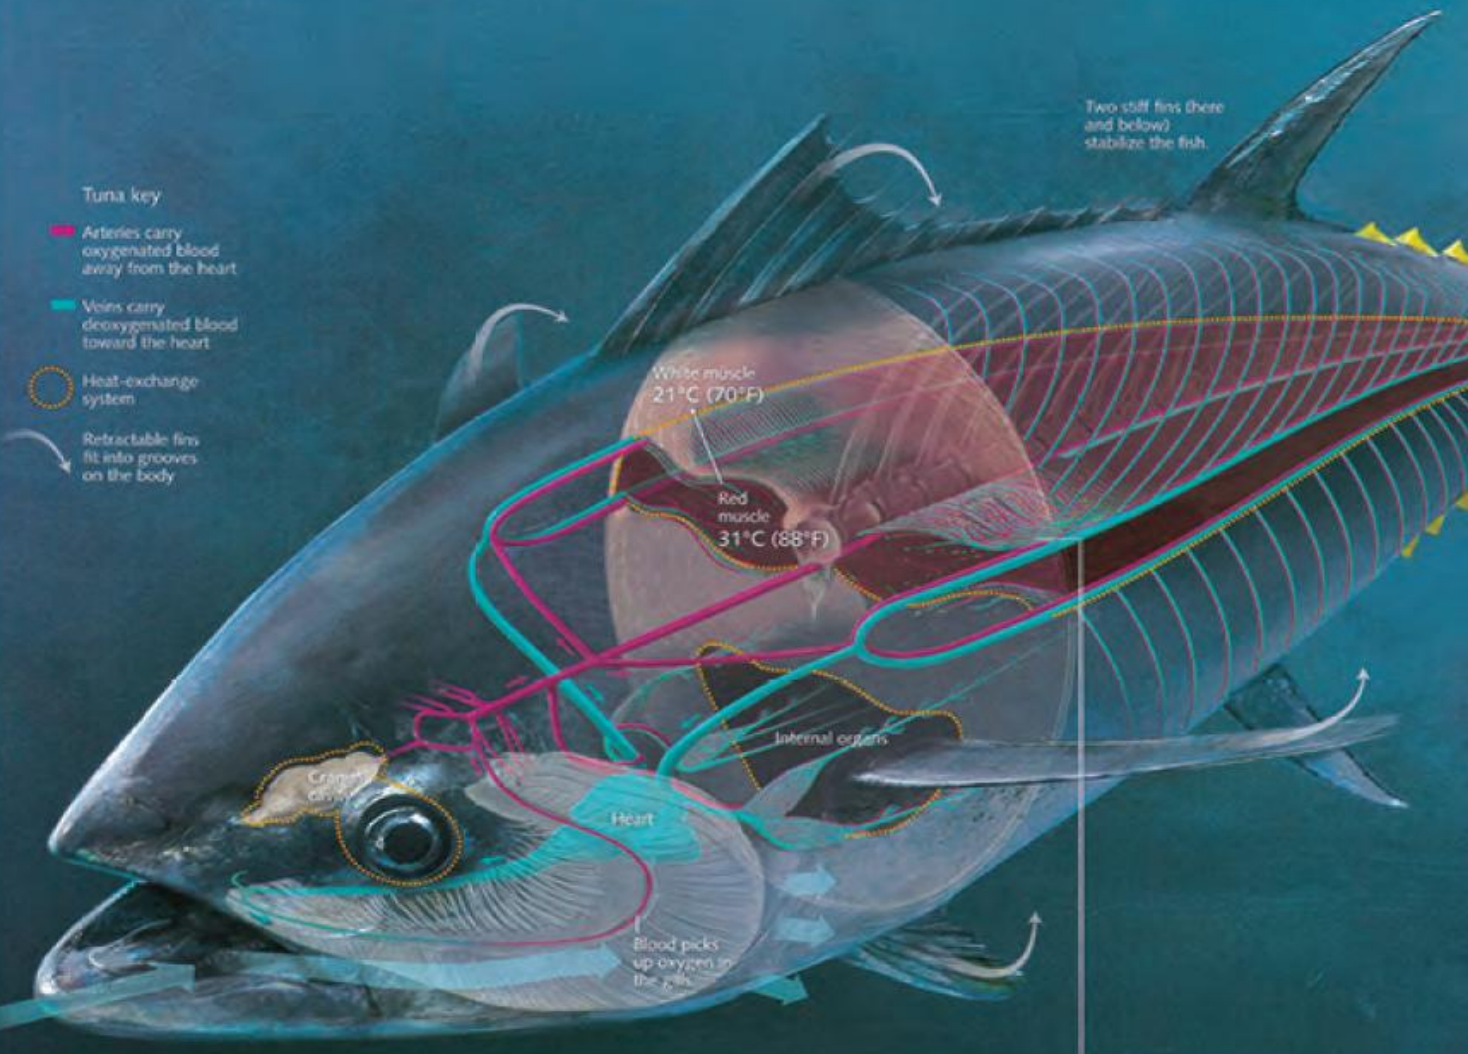

The Super Fish

BREATHING

A bluefin swims with its mouth open, forcing water past the gills in a process called ram ventilation. Its gills have up to 30 times more surface area than those of other fish, and they extract nearly half the oxygen dissolved in the water. If the tuna ever stops swimming, it dies.

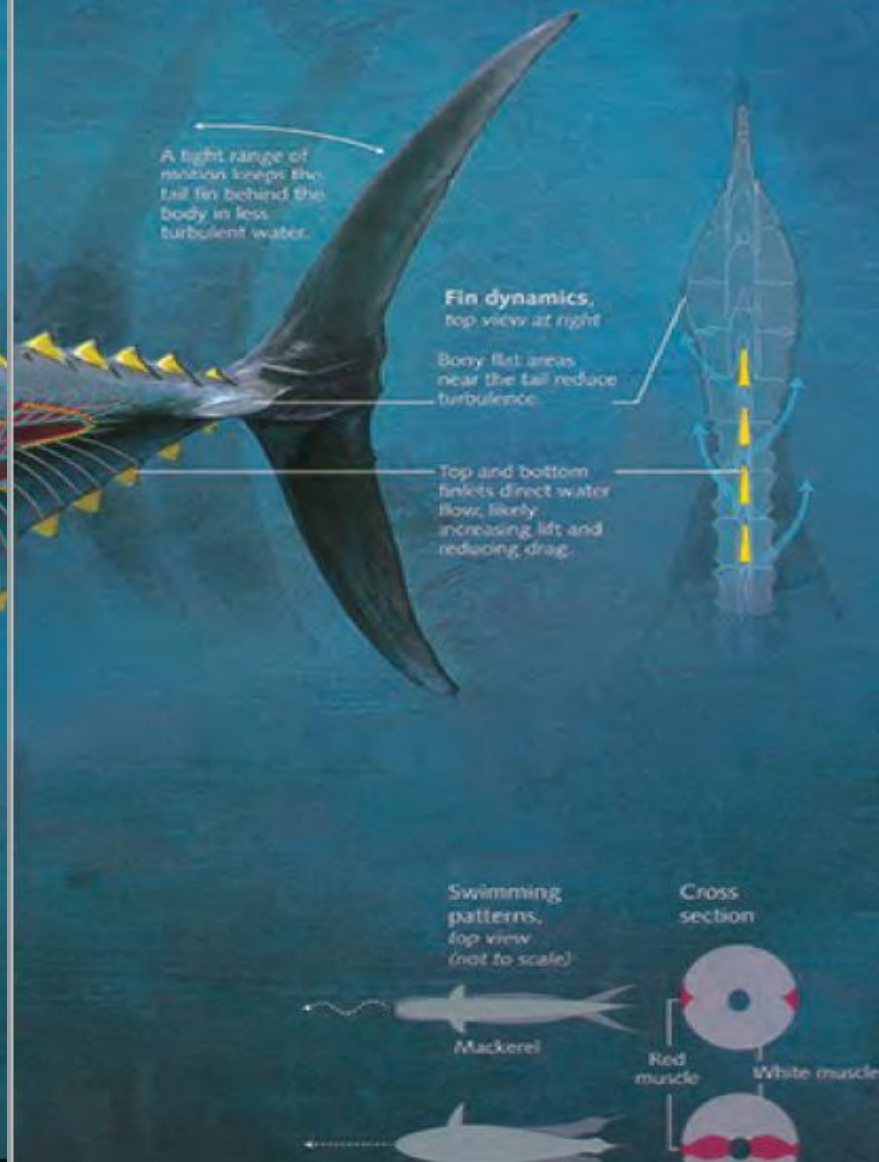

BODY HEAT

Tunas are unique among bony fish in their ability to keep key parts of their body warm. Rather than lose heat to cold water in the gills like most fish, tunas have heat-exchange systems that retain heat produced in the tissue. These systems are present in three areas (orange outline, below).

SWIMMING

The bluefin is one of the fastest fish in the ocean, thanks to a combination of physical characteristics. Its large tail maximizes thrust, while the tapered shape of its body minimizes drag. For superior streamlining, some fins can be pulled into the body when not in use.

Kiribati President, Anote Tong, recently made a 1. (**mingling** / **startling**) announcement: Commercial fishing will end in the country's Phoenix Islands Protected Area. These islands represent some of the most pristine coral reefs in the Pacific Ocean. For years, foreign fishermen have caught and 2. (**collaborated** / **hauled**) away large quantities of fish from the area.

In 2006, Kiribati, an island nation halfway between Hawaii and Fiji, established the Phoenix Islands Protected Area. The park was expanded in 2008, becoming the largest marine protected area in the world at that time, about as large as California.

The president cautioned that declarations of marine protected areas “have no meaning unless they are enforced.” He said technology, such as aircraft and satellite-based tracking **3. (turbulence / gear)**, will be needed to help monitor the vast area. Tong called on other nations to **4. (mingle / collaborate)**. “Let us pool our resources to protect this gift, our mother ocean,” he said.

National Geographic researcher and 5. (shield / scholar) Dr. Enric Sala looks to Spain as an example. Overfishing was 6. (detrimental / deserted) to Spain's fishing grounds decades ago. He explains that once fishing was banned in a marine reserve, the number of fish increased so much that they spread outside of the reserve, reviving the fishing industry and creating jobs. He calls the president's declaration a "great first step."

1. A **shield** is a large piece of metal or wood carried for _____.
a. protection b. farming
2. **Turbulence** is the _____ movement of air or water.
a. soft and gentle b. sudden and violent
3. If an area is **deserted**, _____ there.
a. no one lives b. large groups live
4. When two groups **mingle**, they _____.
a. stay separate b. mix
5. Something that is **detrimental** to your health _____ it.
a. is a positive influence on b. causes damage to

The image features a light green background with a fine dot pattern. It is decorated with watercolor-style illustrations of plants. In the top-left corner, there are white roses and green leaves. The bottom-left corner shows a large white rose and various green leaves. The bottom-right corner contains a variety of green foliage, including a large leaf and a fern. Along the bottom edge, there is a row of small, stylized trees and bushes. The text "Let's play Kahoot !" is centered in a bold, blue, sans-serif font.

Let's play Kahoot !

Reading Comprehension

Multiple Choice. Choose the best answer for each question.

Figurative
Language

1. Which sentence from paragraph A does NOT contain figurative language?
a. One moment the undersea scenery is an empty blue cathedral.
b. Its beams shine down as if from stained glass.
c. Quick-moving tail fins drive them forward at ten knots.
d. Their long, curved fins cut the water like swords.

c

Purpose

2. What is the purpose of the paragraph C?
a. to give reasons for the bluefin's decline
b. to explain why the bluefin is a modern fish
c. to show that ancient Sicilians worshipped the bluefin
d. to explain our long history with the bluefin

d

Vocabulary

3. If you are *up against* something challenging (line 46), you are _____ it.
a. denying
b. facing
c. afraid of
d. comforted by

b

Understanding
Infographics

4. According to the infographic on pages 120–121, which of these is NOT true about bluefin tuna?
a. Its entire body moves from side to side as it swims.
b. Juvenile tunas feed near the water surface.
c. Tunas are able to retain heat produced in their tissues.
d. A bluefin's gills have 30 times more surface area than other fish.

a

Detail

5. Why did Steve Wilson and his team want to tag the bluefin?
a. so they could later identify people who fish bluefin illegally
b. so paying tourists who enjoy fishing could help pay for their research
c. so they could determine the depths to which bluefin can dive
d. so they could track its movements

d lines 11–113

Detail

6. Where are western bluefin NOT found?
a. in the Mediterranean Sea
b. in the middle of the Atlantic Ocean
c. off the coast of the eastern United States
d. off the coast of Spain and Portugal

a lines 132–137

Inference

7. Why does the author discuss sardines in paragraph O?
a. to warn that bluefin could face a similar fate
b. to explain that the cause of their decline remains unknown
c. to show that research done 60 years ago is no longer relevant
d. to give hope of bringing back fish populations after overfishing

a

Critical Thinking

Evaluating: What evidence does the author give when he says that the bluefin has an ancient history of interaction with humanity?

Discussion: What do you feel is the greatest threat to the bluefin? How optimistic are you of its future?

What are **HOMONYMS?**

[HTTPS://WWW.YOUTUBE.COM/WATCH?V=F_7FR59AKMQ&AB_C
H A N N E L = E A S Y T E A C H I N G](https://www.youtube.com/watch?v=F_7FR59AKMQ&ab_channel=EASYTeaching)

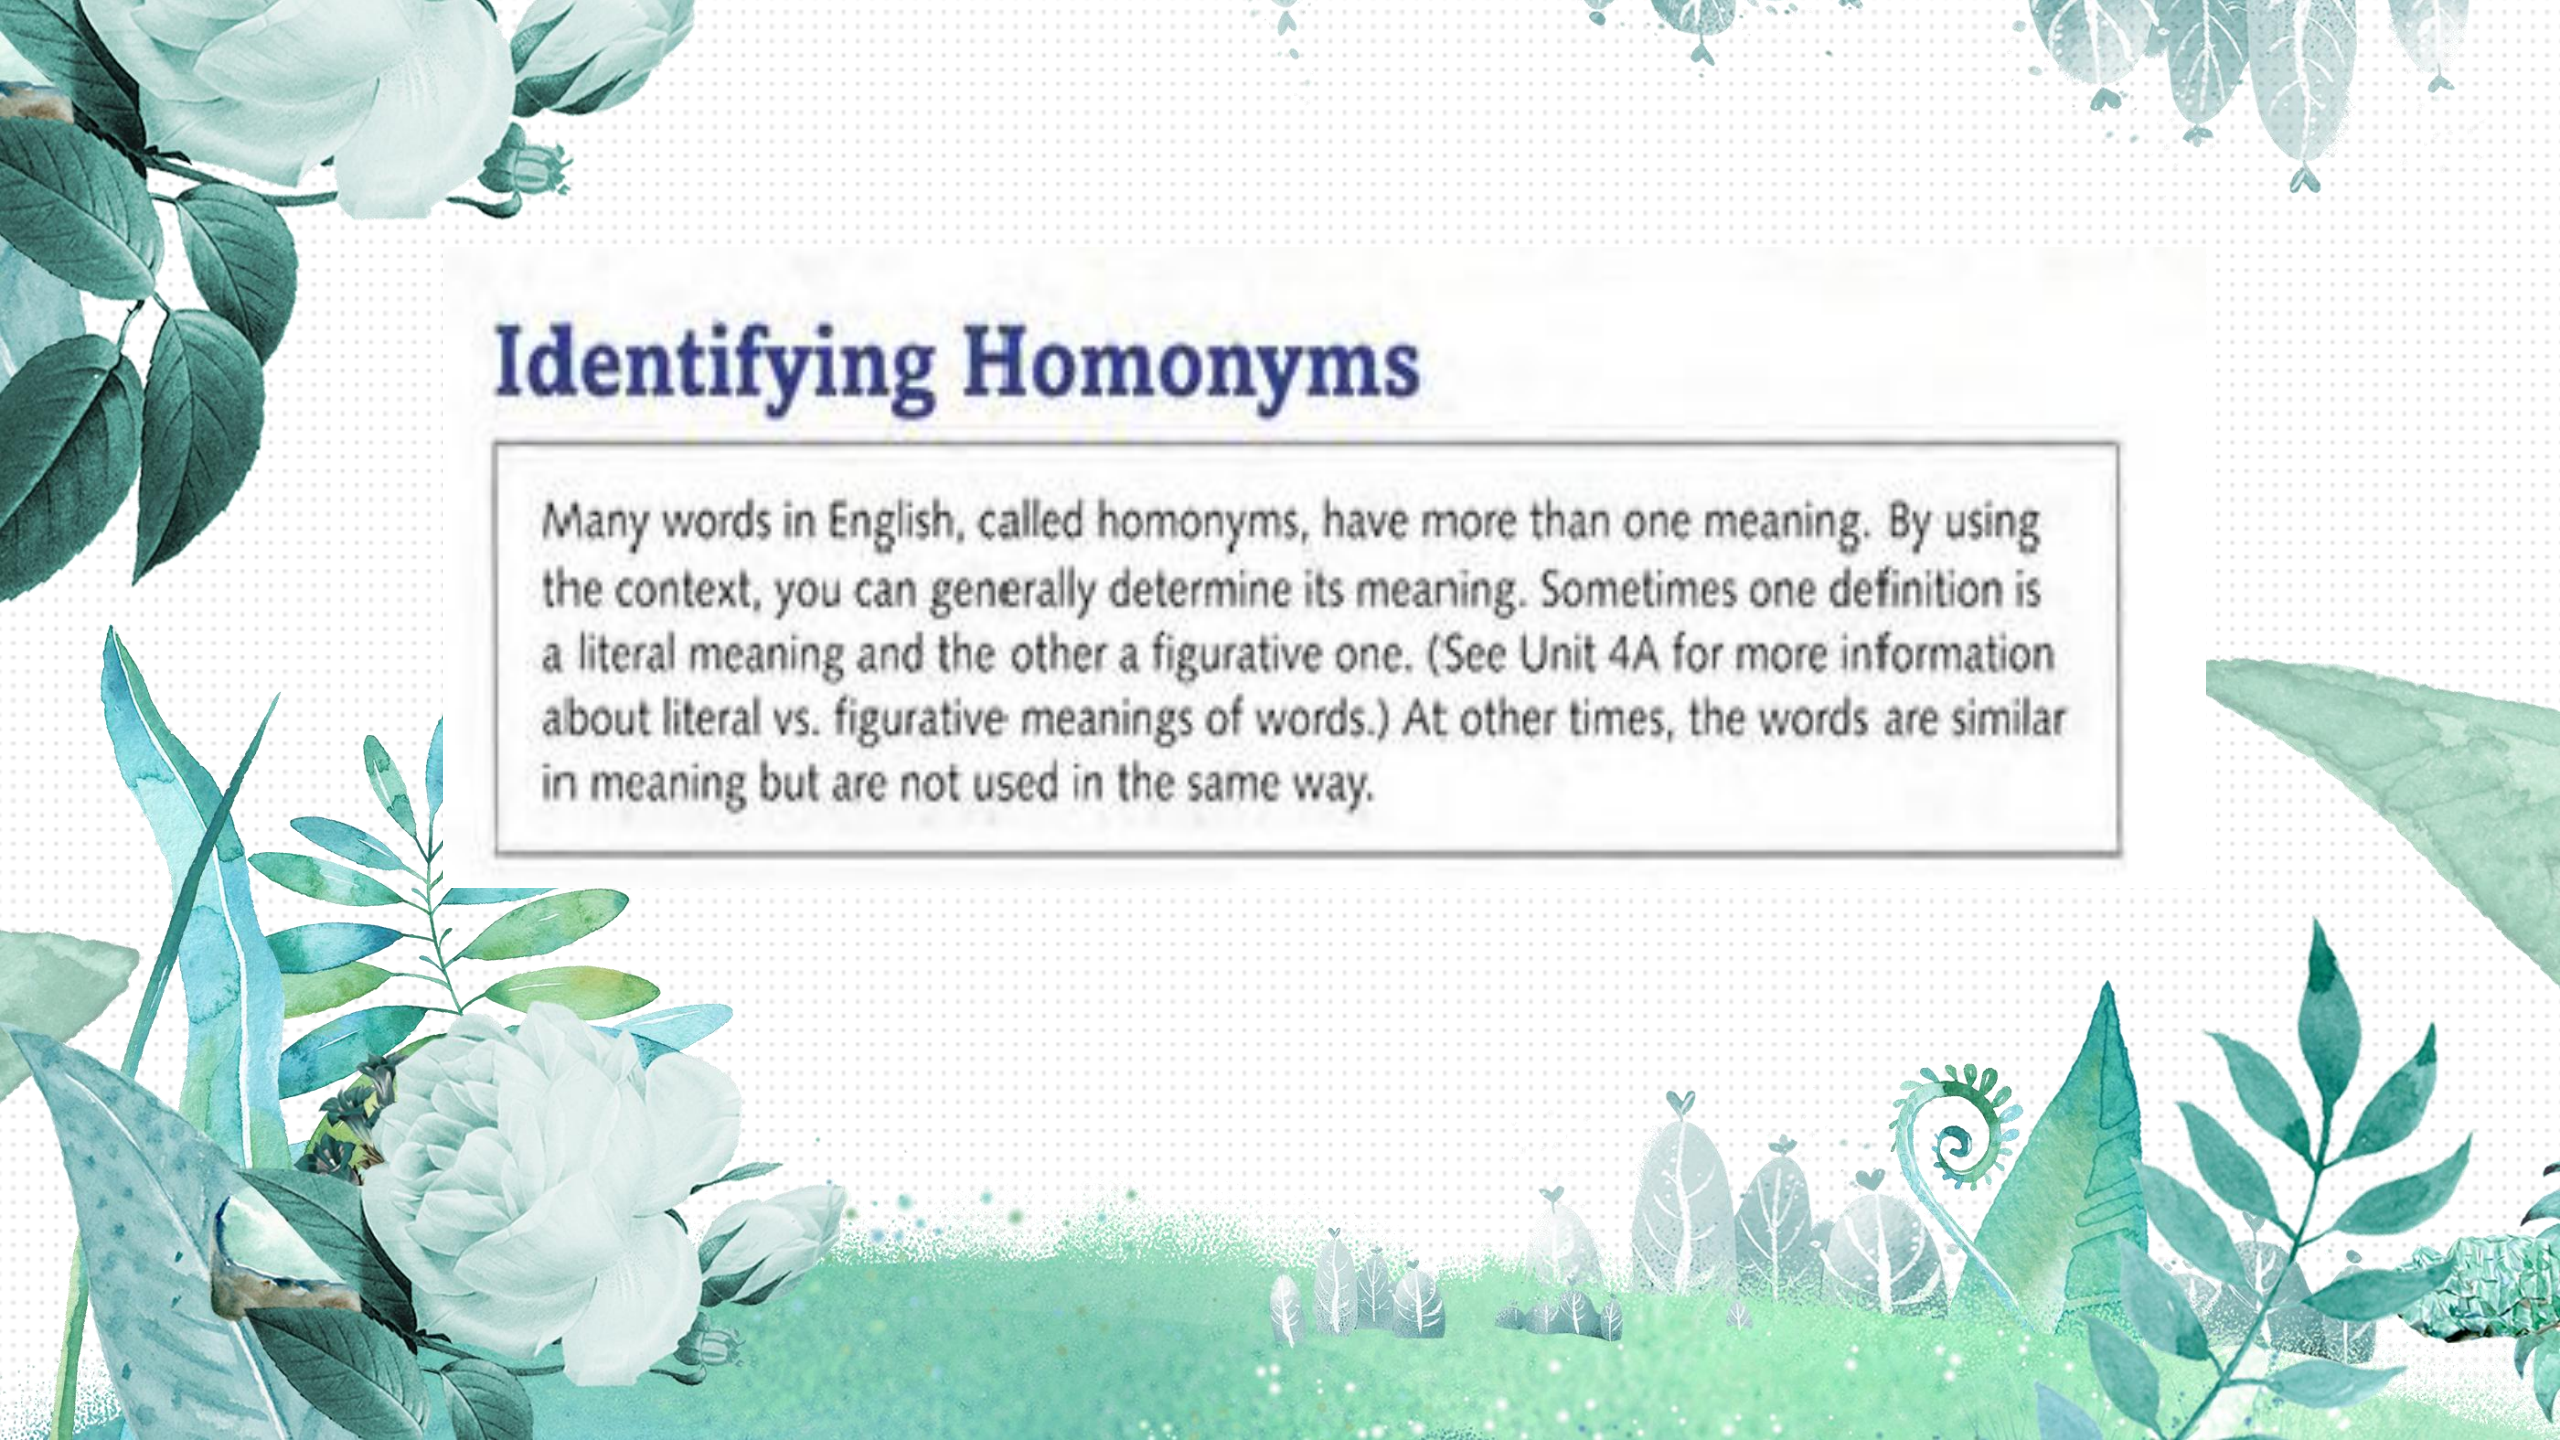

Replace the Incorrect Homophone with the Correct One

Circle the incorrect homophone and write the correct one in the given space.

1. Tiasha tripped on the stare. stair
2. The farmer gave some hey to the horses. hay
3. Dave put some moose in his hair. mousse
4. You have groan so much this year. grown
5. The class will meet at the flag poll this morning. pole
6. My mom bought several prince of my school pictures. piece
7. My ant bakes the best chocolate chip cookies. aunt
8. The green team beets the orange team. beats
9. There are ate kids in the dance class. eight
10. How many presence did you get for your birthday? presents
11. This broken leg is giving me a lot of pane. pain
12. I rap a blanket around my shoulders when I get cold. wrap
13. Laura road the canoe down the river. rode
14. The baby likes to role around on the floor. roll
15. Our car had to be toad to a mechanic. sold

In groups, replace the wrong words with correct ones

A decorative border featuring various green leaves and white flowers, including roses, framing the top and sides of the page. The background has a light green dotted pattern.

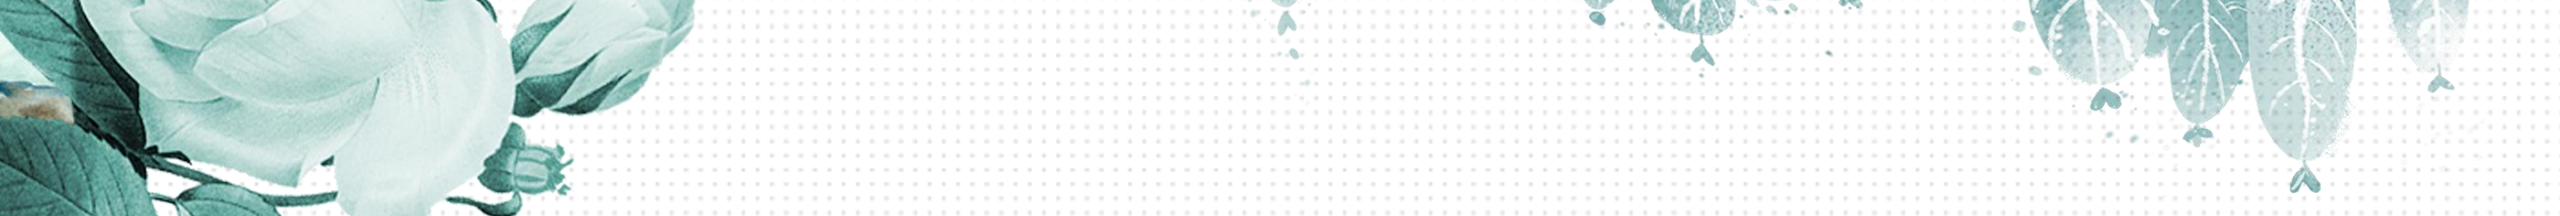

Identifying Homonyms

Many words in English, called homonyms, have more than one meaning. By using the context, you can generally determine its meaning. Sometimes one definition is a literal meaning and the other a figurative one. (See Unit 4A for more information about literal vs. figurative meanings of words.) At other times, the words are similar in meaning but are not used in the same way.

A decorative illustration at the bottom of the page showing a green field with small trees and a large, stylized green fern leaf on the right side.

Definitions. Find these words in the passage. Then decide which definition is correct according to how the word is used in the article.

1. beams (line 2)
 - a. (*pl. n.*) lines of light **a**
 - b. (*pl. n.*) heavy pieces of wood
2. range (line 17)
 - a. (*n.*) the area an animal lives in **a**
 - b. (*n.*) a group of things that are similar
3. yet (line 27)
 - a. (*conj.*) but **a**
 - b. (*adv.*) until now
4. measure (line 45)
 - a. (*n.*) a planned action **b**
 - b. (*n.*) a basis for comparison
5. left (line 51)
 - a. (*v.*) departed **a**
 - b. (*adj.*) opposite of *right*
6. back (line 52)
 - a. (*n.*) rear; opposite of *front*
 - b. (*adv.*) into the past **a**
7. primary (line 69)
 - a. (*adj.*) coming first
 - b. (*adj.*) main **b**
8. lines (line 79)
 - a. (*pl. n.*) people or things in a row **b**
 - b. (*pl. n.*) long ropes or strings for fishing
9. perfectly (line 90)
 - a. (*adv.*) completely **a**
 - b. (*adv.*) without errors
10. dart (line 102)
 - a. (*v.*) to move quickly in a particular direction **b**
 - b. (*n.*) a small object with a sharp point
11. past (line 127)
 - a. (*n.*) a time before now
 - b. (*prep.*) up to and beyond **b**
12. pack (line 133)
 - a. (*v.*) to fill a place **a**
 - b. (*pl. n.*) a group of similar things
13. age (line 161)
 - a. (*n.*) the time something has existed
 - b. (*n.*) a period of time **b**
14. like (line 169)
 - a. (*v.*) to enjoy **b**
 - b. (*prep.*) such as
15. clear (line 173)
 - a. (*adj.*) obvious and apparent
 - b. (*adj.*) easily seen through **a**

Thank you!

**Good luck in
Midterm Exams!**
