

Practice Lab Assignments – Object Oriented Programming 1

Note: 1. Submission only via E-CLASS is acceptable (If you have any issue with E-CLASS, Please consult IT Dept.)

2. Comments should be included in your source code; otherwise, your mark will be ZERO!!

3. Do not plagiarize on doing your work, if we catch student doing so, he/she will get ZERO for the Assignment.

Lab Assignment -8(Arrays)

1. WAP to display an array.
2. WAP to find average of array elements.
3. Write a program to merge to sorted arrays.
e.g: $a1[10]=\{25,27,32,98\}$
 $a2[10]=\{12,23,28,51,72,85,97\}$
then $a3[20]$ should be equal to =
 $[12,23,25,27,28,32,51,72,85,97,98]$
4. WAP to insert an element to an array.
5. WAP to delete an element from an array.
