

Lab Assignments -4– Object Oriented Programming 1

(Week #6: Control Structures (2) – loop/switch)

Note: 1. Submission only via E-CLASS is acceptable (If you have any issue with E-CLASS, Please consult IT Dept.)

2. Comments should be included in your source code.

3. Do not plagiarize on doing your work, if we catch student doing so, he/she will get ZERO for the Assignment.

1. Program to calculate sum of numbers from m to n.

(Hint:

Input two numbers m and n.

Find sum of all numbers from m to n.

For example m=3 and n=8 then sum will be 3+4+5+6+7+8=33.)

2. Program to print sum of first 20 terms of Fibonacci series.

(Hint: The Fibonacci numbers are the numbers in the following integer sequence.

0, 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144,

In mathematical terms, the sequence F_n of Fibonacci numbers is defined by the recurrence relation

$$F_n = F_{n-1} + F_{n-2}$$

$$F_0 = 0 \text{ and } F_1 = 1.)$$

3. Program to input a number and then calculate sum of its digits.

(Hint: let number = 562.

Then you should print 5+6+2=13.)
