

Lab Assignments -6– Object Oriented Programming 1

(Function, Function Overloading)

Note: 1. Submission only via E-CLASS is acceptable (If you have any issue with E-CLASS, Please consult IT Dept.)

2. Do not plagiarize on doing your work, if we catch student doing so, he/she will get ZERO for the Assignment.

1. WAP to swap two values using functions.
2. WAP to convert time to minutes using functions.

(Hint:

Input three variables for hours , minutes and seconds.

Convert hours and seconds also into minutes and then add all three values and display value of minutes.

While taking input just keep in mind if someone input minutes = 65 (it will be equal to 1 hour and 5 minutes)

Same is applicable for seconds too.

)

3. WAP to calculate area of following figures using function overloading:

1. Circle
2. Rectangle
3. Triangle
4. Square

(Hint: 1. create 4 functions with same name **area**.

2. Each function to calculate area of one figure.

)

4. WAP using function overloading:

1. To find largest among three integers
2. To find largest among three floating point numbers.
