

Assignment # 3

Topic covered: Programming assignment that involves const member function, friend function, composition, friend functions and this pointer

1 Define a class **FullName** and **Player** with the following specification

FullName
-FirstName:string -MiddleName:string -LastName:string
<<constructor>>+FullName() +setFirstName(string) +getFirstName():string +setMiddleName(string) +getMiddleName():string +setLastName(string) +getLastName():string

Player
-Player_ID:string -Player_Name:FullName -Matches_Played:int -Goals_Scored:int
<<constructor>>+Player() +setPlayer_ID(string) +getPlayer_ID():string +setMatches_Played(int) +getMatches_Played():int +setGoals_Scored(int) +getGoals_Scored():int +setPlayer_Name(Fullname) +getPlayer_Name() <<friend>>+Increase_GoalsScored(Player ,int)

Special Note : In class diagram + for public, - for private

Increase_GoalsScored(int) is friend function for Player: This function will increase Goal_scored by some int every time when called.

Write C++ program create object pointer(through new) to Class Player and menu driven program to

1. add player details (allocate memory for object and get player details) ,
2. display player details,
3. increase player goal scored
4. delete player from memory
