

INHA UNIVERSITY TASHKENT DEPARTMENT OF CSE & ICE

Fall 2023 – Application Programming in Java

Lab Assignment # 3

Topic covered : Introduction to Inheritance – 2: super, this, constructor, method overriding and polymorphism

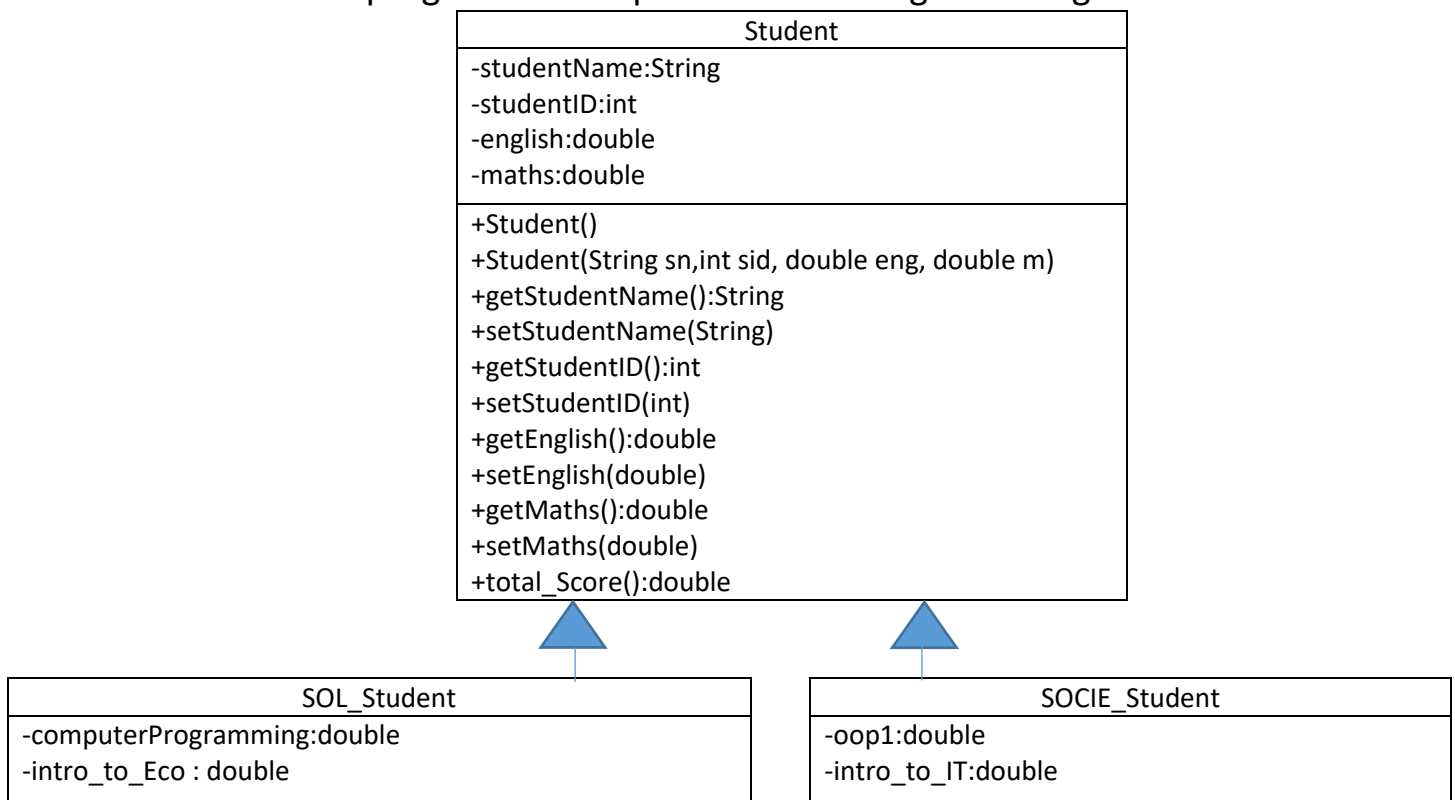

Last Date of Submission: 7/10/2023

INSTRUCTIONS:

- Program should be well commented.
- Program should be easy to use.
- All Lab assignments are to be completed by an individual student on his/her computer system and not in groups

Problem:

Write a JAVA program that implement following class diagram:

```
+SOL_Student()  
+SOL_Student(String sn, int sid, double eng, double m,  
double cp, double ite)  
+getComputerProgramming():double  
+setComputerProgramming(double)  
+getIntro_to_Eco():double  
+setIntro_to_Eco(double)  
+total_Score():double
```

```
+SOCIE_Student()  
+SOCIE_Student(String sn, int sid, double eng,  
double m, double op1, double iti)  
+getOOP1():double  
+setOOP1(double)  
+getIntro_to_IT():double  
+setIntro_to_it(double)  
+total_Score():double
```

InheritanceDemo
+main(String[] args)

Create InheritanceDemo class (Driver Class) and take objects (instances) of classes (Student, SOL_Student , SOCIE_Student) and Demonstrate inheritance with constructor, polymorphism and super and this keyword with overriding.
