

INHA UNIVERSITY IN TASHKENT
School of Computers and Information Engineering
Fall semester 2023

(Students Learning Assignment)
Data Structures SOC 2010
Submission Date: 14th Week (Thursday)

Problem-Requirements

- Identify any problem that you see in day to day life and propose to solve it [eg. Car parking, managing student's data, family tree, representing locations using graphs, managing inventory etc.]
- You need to demonstrate the operations by creating a sample application
- Explain in detail about the data structure you have used to solve the problem. Discuss its properties and the operations.
- Justify the selection of data structure in your application
- Identify the limitation and scope of improvement of your solution.
- Comment on how important is this subject in computer science and how you will benefit after studying this course.

Important Points

Note: Every instruction need to be strictly followed to avoid any penalty score

1. This assignment to be done individually or in a team of maximum 3 members
2. You are required to prepare a word-document **report** which must cover all the above points mentioned.
3. Each student has to upload his/her report on e-class **individually**
4. Your report must strictly follow **Report Format** provided to you.

Report requirements

5. A report can be of minimum 8 and maximum 12 pages which should contain the detailed explanation of your work along with its implementation.
6. Use illustrative graphs or images to elaborate your idea.
7. Use Font- Times-New-Roman, Font Size – 11 , (All Headings must be **bold**)
8. Use 1.5 Spacing and all paragraph must be justified

Project Report

Use the template/format provide to you to prepare your project report. Read the guidelines very carefully to avoid losing any marks.
