Linear Algebra

1Week [04 September - 10 September]

Quiz 1

Started on	2023-09-09 19:12
State	Finished
Completed on	2023-09-09 19:19
Time taken	6 mins 41 secs
Marks	5.00/5.00
Grade	2.00 out of 2.00 (100%)

Question 1

Correct

Mark 1.00 out of 1.00

Nontrivial solution is

Select one:

- ☐ a solution of all nonzeros
- ☒ nonzero solution ✓
- ☐ a solution of all zeros

Your answer is correct.

The correct answer is: nonzero solution

Question 2

Correct

Mark 1.00 out of 1.00

A system of linear equations is said to be homogeneous if

Select one:

- ☐ it cannot be written in the form $Ax = 0$
- ☒ it can be written in the form $Ax = 0$ ✓
- ☐ it has infinitely many solutions
- ☐ it can be written in the form $Ax = b$
- ☐ it has no solution

Your answer is correct.

The correct answer is: it can be written in the form $Ax = 0$

Question 3

Correct

Mark 1.00 out of 1.00

Find all elementary row operations

Select one or more:

- ☒ Replace one row by the sum of itself and a multiple of another row ✓
- ☒ Interchange two rows ✓
- ☐ Multiply rows
- ☒ Multiply all entries in a row by a nonzero constant ✓

Your answer is correct.

The correct answers are: Replace one row by the sum of itself and a multiple of another row , Interchange two rows, Multiply all entries in a row by a nonzero constant

Question 4

Correct

Mark 1.00 out of 1.00

Find true statements

Select one or more:

- ☐ Reduced row echelon form of a matrix may have zero in a pivot position
- ☒ Each matrix is row equivalent to one and only one reduced echelon matrix ✓
- ☐ Row echelon form of a matrix should not have zero in a pivot position
- ☒ A linear system is consistent if and only if the rightmost column of the augmented matrix is not a pivot column ✓

Your answer is correct.

The correct answers are: Each matrix is row equivalent to one and only one reduced echelon matrix, A linear system is consistent if and only if the rightmost column of the augmented matrix is not a pivot column

Question 5

Correct

Mark 1.00 out of 1.00

A system of linear equations is said to be consistent if

Select one:

- ☐ it does not have solution
- ☒ it has either one solution or infinitely many solutions ✓
- ☐ it has infinitely many solutions
- ☐ it has one solution

Your answer is correct.

The correct answer is: it has either one solution or infinitely many solutions
