

Project Title: Candidate's Election Campaign**Task Description**

The objective: To choose a candidate, work out a program to support a candidate and persuade people to vote for him/her.

Conduct a needs assessment: Conduct interviews, surveys, or polls to define some of the biggest problems about living in your city and brainstorm some solutions to these problems to include them into your candidate's program.

Define project goals: Clearly define the goals of the project. For example:

Goal 1: To work out the methods to gather information about the problems about living in your city.

Goal 2: Conduct a research using those methods and define three main problems your candidate will solve.

Goal 3: Design your candidate's plan, listing solutions for these three problems.

Goal 4: Introduce your candidate and his program to the public.

Brainstorm solutions: Generate ideas for potential solutions.

Iterate: Perform your candidate's Election Program, including explanation of three basic problems the candidate is going to solve and the ways he/she will do that.

Collaborate with stakeholders: Engage with local citizens to involve them in the project. Seek their input, feedback, and suggestions throughout the process to ensure that chosen problems are really the most urgent ones and possible solutions are appropriate.

Evaluate and measure impact: Establish metrics to assess the impact of the problems on people life. Collect data and conduct evaluations to measure the effectiveness of solutions proposed in the candidate's program.

Final Report:

Create a comprehensive final report that summarizes all aspects of the project, including the problem statement, goals, and objectives.

Include sections on the research conducted, needs assessment, program design process, implementation details, and lessons learned.

Provide visual representations, screenshots, videos or images to illustrate the candidate's election campaign and its features.

Include quantitative and qualitative data to support the impact of the problems and effectiveness of proposed solutions, such as metrics, feedback from people, and outcomes of the program.

Presentation in Class:

Prepare a presentation to share your work with your classmates in Week 14.

Structure your presentation to cover the key aspects of the project, including problems statement, goals, program design process, implementation details, and lessons learned.

Use visual aids, demonstrations, or interactive elements to showcase your candidate's election campaign program.

Allow time for questions and discussion to engage your audience and gather feedback.

Group Size: 5 students

Group Formation:

Form groups with a mix of skills and interests relevant to the project, such as design, research, and presentation.

Labor Division:

A **Group Leader** assigns specific roles and responsibilities to each member. The following labor division is suggested:

Project Manager: Responsible for overseeing the overall project, coordinating tasks, and ensuring timely progress.

Researcher: Responsible for conducting research on the most relevant problems about living in your city, collecting data, and analyzing findings.

Designer: Responsible for designing election campaign program.

Candidate: Responsible for making speech on the problems defined and their solutions.

All the members are responsible for preparing the PowerPoint presentation and delivering it to the class.

PowerPoint Presentation:

Create a PowerPoint presentation to share your work with the class in Week 14.

The presentation should be structured as follows:

Introduction: Present the project title and objectives.

Needs Assessment: Share the research findings, including information about the specific needs, constraints, and contextual factors in the city you live in.

Project Goals: Clearly present the defined problems and goals of your candidate.

Solutions: Showcase the generated ideas and chosen solutions together with potential ones (which were not chosen and why).

Collaboration: Demonstrate the developed program, highlighting the iterative process, people's feedback, and collaboration with stakeholders.

Sustainability and Impact: Discuss considerations for scalability, affordability, adaptability, and long-term impact of the proposed solutions. Present the established metrics and evaluation results related to the problems chosen.

Lessons Learned: Share insights gained throughout the project, including challenges, solutions, and key takeaways.

Conclusion: Summarize the project's achievements, impact, and future implications.

Q&A and Discussion: Allocate time for questions, feedback, and discussion from the classmates and instructor.

Presentation Tips:

Use visual aids, such as screenshots, images, or videos, to illustrate the interaction with electorate.

Speak clearly, engage the audience, and maintain a professional demeanor.

Manage time during the presentation, ensuring that all key aspects of the project are covered within the allocated time.

Allocated time: 20 minutes

Where to submit PPTs: eclass

Deadline: Week 14
