

Inha University in Tashkent

***Theme 10:* Education System and Cultural Development**

Tashkent – 2024

Outline:

INITIAL STAGE OF
EDUCATIONAL REFORMS

LAW “ON EDUCATION” AND
NATIONAL PROGRAM FOR
TRAINING PERSONNEL

SYSTEM OF EDUCATION
AND ITS STRUCTURAL BASE

STATE POLICY ON CULTURE
AND IMPLICATIONS OF
REFORMS

Initial Reforms on Education

- Upbringing harmoniously developed generation through:
 - education
 - culture
- The development of education and culture in Uzbekistan is:
 - the most fundamental
 - relevance issues.
- A number of changes were made in the field of education after adoption:
 - Law "On Education" (July 2, 1992)
 - more than 30 Presidential Decrees and Decisions of Cabinet of Ministers.

Measures in the field of Education

- The following measures have been undertaken during the implementation of these laws and decisions since 1991:
 - ☐ Network programs - "For Healthy Generation", "Economic Education", "Rural School";
 - ☐ Preschool education - kindergartens and "kindergarten-school" network;
 - ☐ 238 lyceums and 136 gymnasiums (1992-1996);
 - ☐ 442 secondary special and vocational institutions, including 209 vocational schools and 53 business schools;
 - ☐ According to the decree of the President of the Republic of Uzbekistan (dated February 28, 1992) 8 regional pedagogical institutes were converted into universities.

Measures in the field of Education

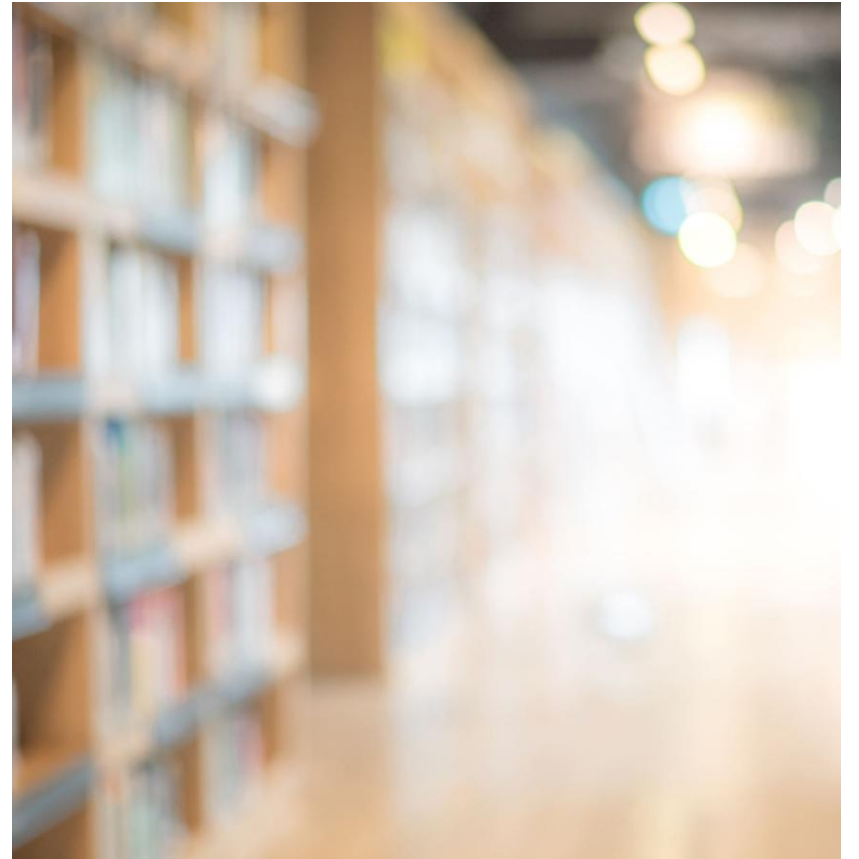

- ❑ In higher education system - 58 higher education institutions, including 16 universities and 42 institutes. 164 thousand students, 18.5 thousand professors and teachers;
- ❑ According to the Resolution of the Cabinet of Ministers of the Republic of Uzbekistan from May 14, 1994, of N 258 "On the Establishment of the State Testing Center under the Cabinet of Ministers of the Republic of Uzbekistan", the State Testing Center was created. The State Testing Center was entrusted with the organization and conduct of testing at higher and secondary specialized educational institutions. Since 1994, the selection of applicants with the use of testing methods has been introduced in higher education institutions.
- ❑ 'Ulugbek', 'Umid', 'For Healthy Generation' 'Istedod' and other foundations were established
- ❑ Partnerships with international organizations such as IREX (The International Research & Exchanges Board), Peace Corps (USA), DAAD, Konrad Adenauer Foundation (Germany), British Council (UK) were established.

Shortcomings in the sphere

While a number of measures were taken in the education system, there were still serious shortcomings and problems in this area:

- ✓ The education system, the training of personnel were not linked to the democratic changes taking place in the society and the requirements of market reforms.
- ✓ The material and information base of the educational process was in poor condition. Educational facilities lacked modern teaching materials.
- ✓ Highly qualified teachers were not enough.
- ✓ Cooperation between the education system, science and industry was not integrated.

Radical Reforms in Education

- At the initiative of the first President Islam Karimov, ways to radically reform education were developed. Islam Karimov made a report at the ninth session of the Oliy Majlis on 29 August 1997.
- It was argued that the fate of the realization of the great goals, first of all, is closely related to the problem of training of highly skilled specialists meeting the requirements of the time and the following tasks have been put forward:
 - to abandon the ideology inherent to the educational system of the former Soviet era;
 - improving the national education system, strengthening its national identity, raising the level of international standards;
 - organization of continuous education system;
 - raising the material base of educational institutions to modern requirements;
 - to provide pupils and students with modern knowledge;
 - establishment and strengthening of relations of the higher educational institutions of the republic with foreign countries, organization of training of young people, professors and teachers at educational centers of developed countries.

National Program for Training Personnel

- On August 29, 1997, at the ninth session of the Parliament of the Republic of Uzbekistan, a new edition of the Law of the Republic of Uzbekistan "On Education" and "National Program for Training Personnel" were adopted. The following basic principles of the state policy in the area of education were defined:
 - ✓ education and upbringing are humane, democratic;
 - ✓ continuity and consistency of education;
 - ✓ compulsory general-secondary and secondary special, vocational education;
 - ✓ the voluntary choice of the direction of secondary special and vocational education: study at the academic lyceum or vocational college;
 - ✓ the secular nature of the education system;
 - ✓ public access to education in accordance with the standards.

Organization of continuous education system

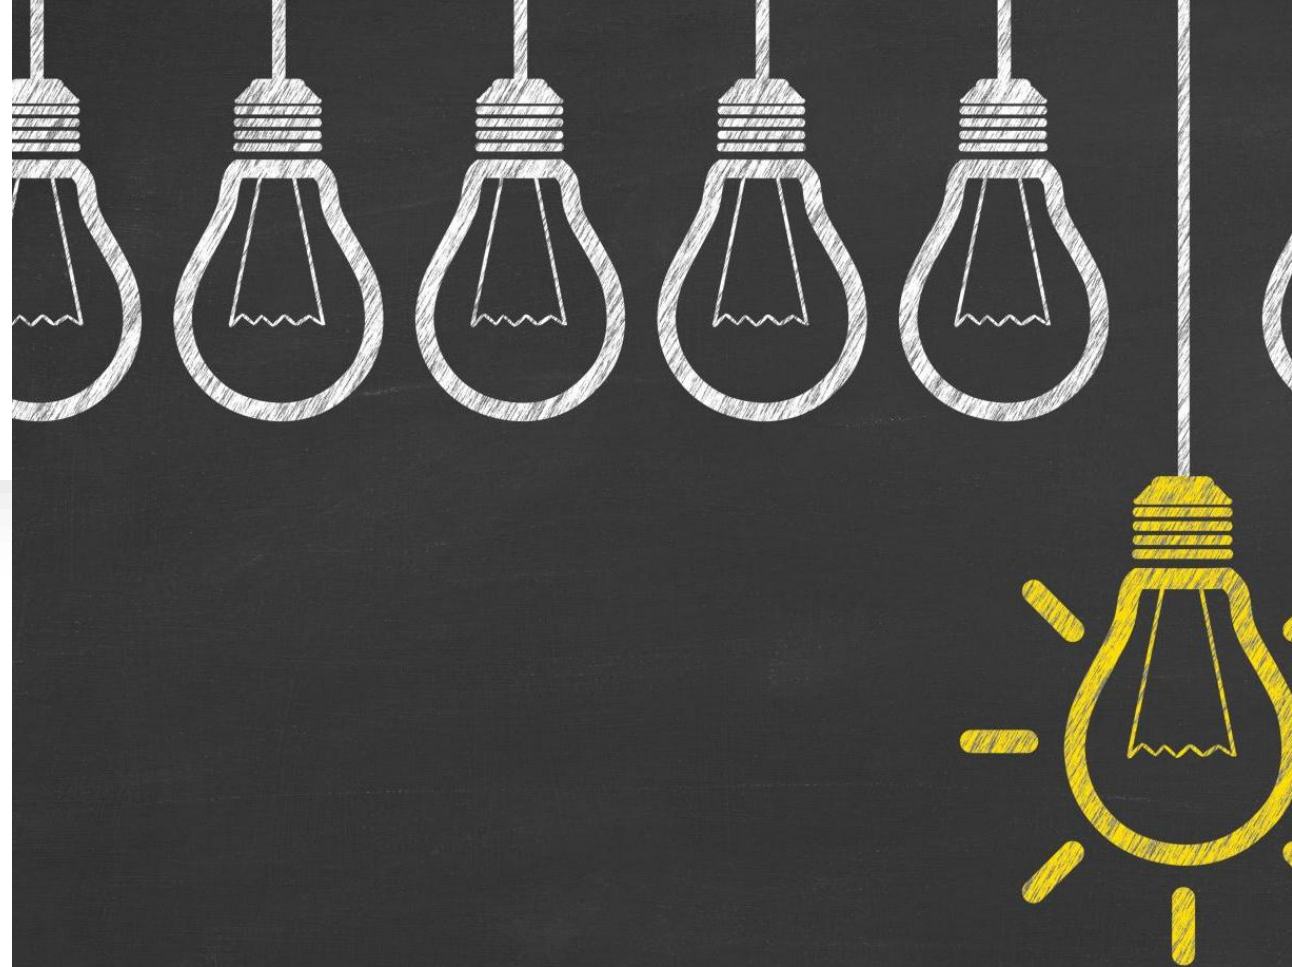

- The following types of education are in practice in the Republic of Uzbekistan:
 - pre-school education;
 - general secondary education;
 - secondary special and vocational education;
 - higher education;
 - post-graduate education;
 - retraining of personnel;
 - out-of-school education.

The Stages of Realization

- On the basis of National Program and the Law, it was planned to implement the reform in three stages.
- ❖ **In the first stage (1997-2001)**, the objective was to develop legal, human resource, scientific and methodological, financial and material conditions for the reform and development of this system based on the positive potential of the existing system of training.
- ❖ **In the second phase (2001-2005)**, the National Program was fully implemented, with the development of the labor market and relying on the real socio-economic situation.
- ❖ **Based on the results of the third stage (2005 and subsequent years)**, the system of training personnel has been improved and developed according to the prospects of socio-economic development of the country by using analysis and generalization of experience.

The Stages of Realization

- Relevant ministries and scientific organizations have been established for realization of reforms in the field of education. They are:
 - 1) Ministry of Preschool and School Education of the Republic of Uzbekistan
 - 2) Ministry of Higher Education, Science and Innovation of the Republic of Uzbekistan
 - 3) Academy of Sciences

Ministry of Preschool Education in 2021

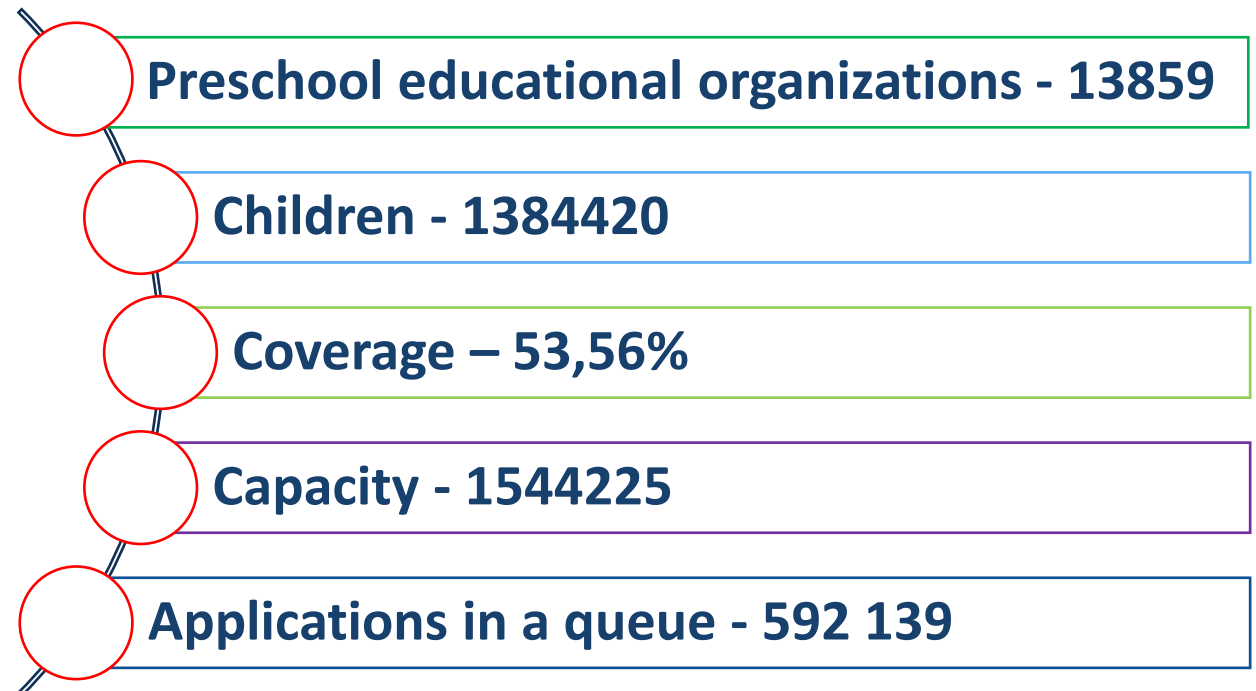

- Over the past 20 years, the number of state-run preschools has decreased by more than 45%, and the coverage of children with preschool education in the country was 30%.

Also, the material and technical base of preschool education institutions did not meet modern requirements.

Therefore, the Ministry of Preschool Education was established in accordance with the Presidential decree 'On Measures to Definitely Improve the Management of Preschool Education System'.

Secondary vocational education system

- The most important feature of the National Program for Training Personnel in Uzbekistan was the task of creating a new type of 3-year secondary vocational education system. In the period 1998-2006, 79 academic lyceums and 882 professional colleges were built in Uzbekistan.
- In accordance with the Decree of the President of the Republic of Uzbekistan "On further improving the system of targeted training of candidates for admission to higher education institutions" dated September 26, 2018, the period of study in academic lyceums is set at two years.
- The guidance of the process and this particular section of the system of education are rested in the Ministry of Higher and Secondary Special Education.
- There are 68 academic lyceums in the country, which specialize in exact sciences, natural sciences, foreign languages, social sciences and humanities.

Higher education

- The main goal of higher education is to train qualified, competitive, highly educated specialists who can meet the requirements of the time. Higher education consists of two stages:
 - undergraduate
 - master
- Baccalaureate is a basic higher education with fundamental knowledge in one of the areas of higher education with a study period of at least four years.
- Master is a higher education in a specific specialty with a duration of study of at least two years on the basis of undergraduate studies.
- In terms of structural basis, higher education consists of:
 - 1) Higher Education Establishments
 - 2) Scientific-Pedagogical Organizations
 - 3) State Authorities on the Management of Education

Currently, there are 209 higher educational institutions

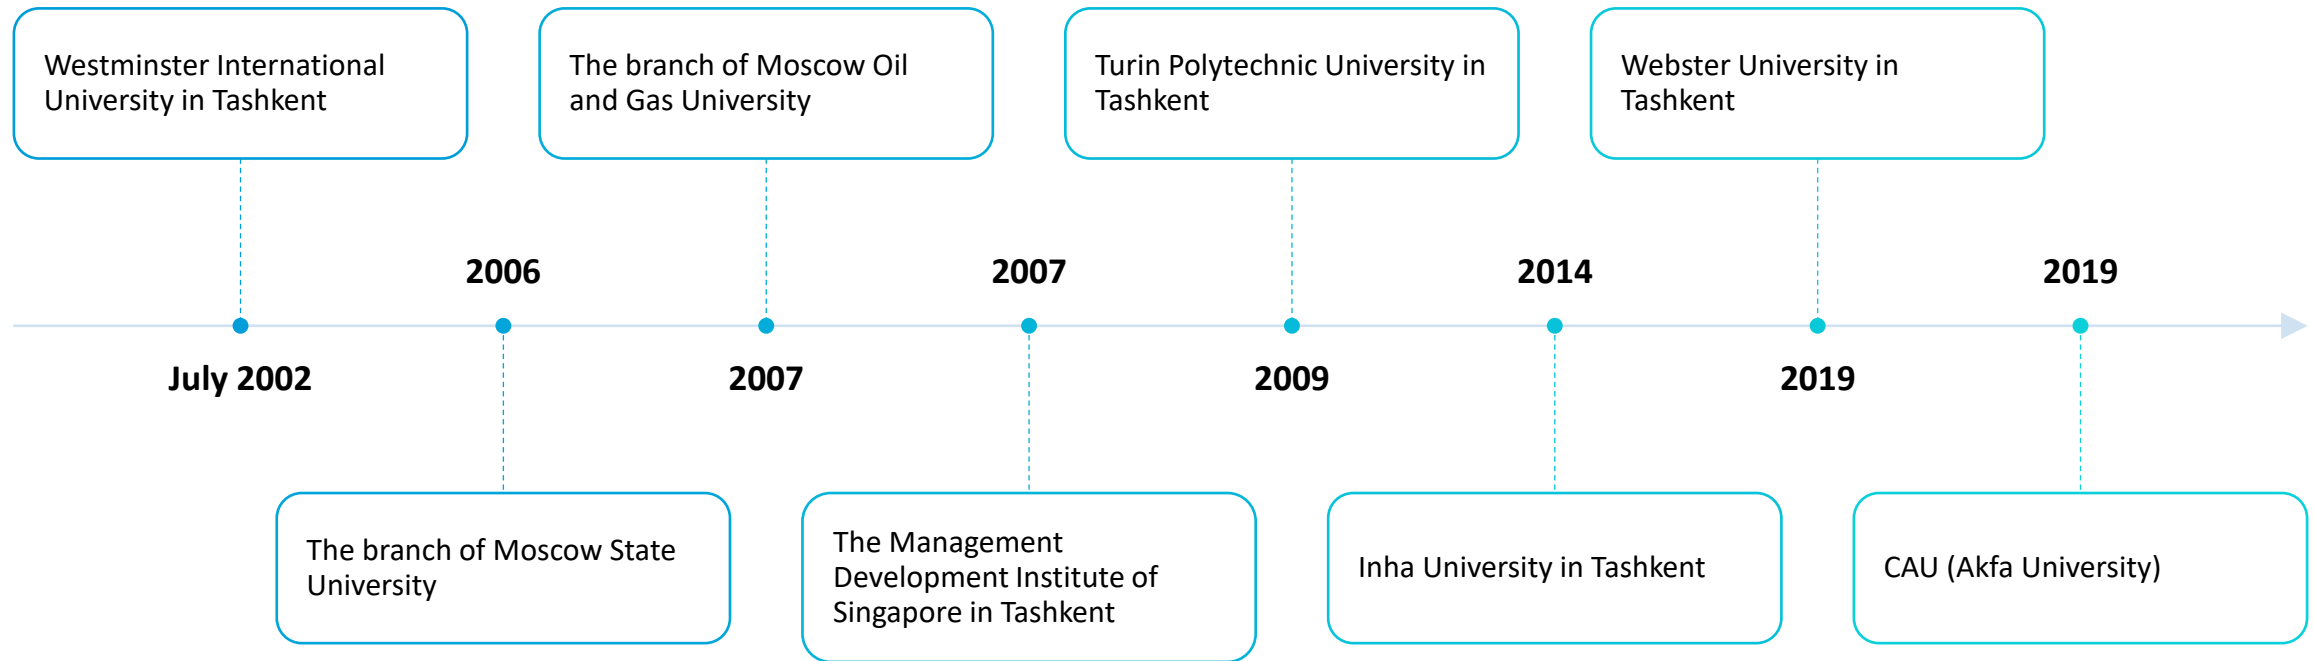

■ State -114

■ Private - 69

■ International -26

Foreign universities

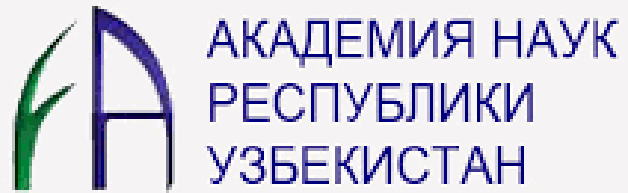

State Foundations

- According to the decree of the President of the Republic of Uzbekistan, the creation of the “Umid” Foundation on January 7, 1997 was the first step in the training of young professionals devotedly serving the Motherland, able to contribute to the development and prosperity of their country, and to adequately represent it at global level.
- on January 7, 2003, according to the decree of the President of the Republic of Uzbekistan, the “Istedod” Foundation was established on the basis of the “Umid” and “Ustoz” Foundations to improve the skills of young teachers and promising scientific personnel.
- With the assistance of the foundation, from 1997 to 2003, about 828 talented youth were educated in the world's best educational institutions, under the bachelor and master programs
- On September 25, 2018, by the decree of the President of the Republic of Uzbekistan No.5545, the “El-yurt umidi” Foundation was established under the Cabinet of Ministers of the Republic of Uzbekistan to organize the training of specialists abroad and to establish dialogue with compatriots, to which all rights and obligations of the “Istedod” Foundation were transferred.

Academy of Sciences of Uzbekistan

The Academy of Sciences of the Republic of Uzbekistan was established in November 1943. The Academy has a great history and hundreds of great achievements in its various fields. The Academy of Sciences of the Republic of Uzbekistan performs the following tasks:

- Conducts fundamental and applied research in the field of natural, technical, medical, social and humanitarian sciences and thereby contributes to the economic, social and spiritual development of society;
- Ensures the implementation of state policy in the field of science;
- Carries out the development and practical implementation of new types of equipment and modern technologies;
- Promotes the effective integration of science, education and production;
- Provides organization and development of cooperation with academies, universities, scientific institutions, foundations and other related organizations of foreign countries, as well as international scientific organizations.

Academy of sciences of Uzbekistan

- The Academy of Sciences consists of 28 research institutions and 4 state museums and 2 regional branches - Karakalpak and Khorezm Mamun Academy (was reorganized in 1997).
- These research institutions are organizationally combined into three complexes in scientific areas:
 - 1) physical and mathematical and technical sciences;
 - 2) chemical and biological sciences;
 - 3) social sciences and humanity.
- The system of the Academy of Sciences of the Republic of Uzbekistan employs more than 4793 employees, including more than 2200 researchers, 73 academicians, 281 doctors and 745 candidates of sciences.
