

GUIDELINES FOR INCLUDING REFERENCES IN THE REPORT – SPRING 2024

Dear All

You might have referred Internet Resources, books, Magazines, periodicals to write answers for Part I and PART II Descriptive questions of SP LAB ASSIGNMENT1.

There are several questions regarding the standard way of citing the references and listing all the references.

Here I am providing you the IEEE standard way of citing and listing the references.

In your document if you have used some part of text from Internet resources or Books, or Magazines or periodicals (Normally you should not go for CUT and PASTE, but rewrite them in your own words) then immediately after every part of text you should cite the reference in square brackets LIKE THIS [1].

In order to do that you are required to list all the references separately at the end of the Lab Report and number them in ascending order starting from [1], as shown in the sample REFERENCES section given below here

Once you have created the REFERENCES section on a separate sheet at the end, you can now specify the number of the reference at the end of the part of that text used in your document in square brackets as shown in the sample text below. THIS IS KNOWN AS CITING THE REFERENCES AS INDICATED BELOW.

For a descriptive answer, you can refer several resources, but you need to list all of them in the REFERENCES section.

Sample text

Low power wireless networks like wireless sensor networks (WSNs) have generated renewed interest due to the effectiveness of the solutions offered by Internet of Things (IoT) [1]. In this context, several issues are investigated to fit different applications of IoT [2]. One of the major challenges in IoT is the need for energy efficient protocols for the underlying wireless sensor network of devices [3]. An IoT network, similar to a WSN, is comprised of several wireless devices that are constrained in terms of processing, power, and memory. Lot of research has been carried out addressing these challenges in WSN. However, with the new emerging applications of WSN, and with the capability to control and manage the devices over the Internet (therefore referred to as IoT), most of the existing solutions for WSN are re-designed to meet the requirements of different IoT applications [4]. The different applications of IoT include cities, energy grids, industries, healthcare, transportation, homes, and any possible applications that a human mind can fathom [5]. With the emergence of these smart applications, and with the capability to be connected to the Internet provides the ability for a user to manage and control these devices remotely.

THE REFERENCES section must be written on a separate sheet and included at the end of the LAB REPORT. IT MUST START WITH THE SECTION HEADING : REFERENCES

IF YOU ARE REFERRING A PAPER IN A JOURNAL OR CONFERENCE PROCEEDINGS THEN YOU NEED TO SPECIFY THE REFERENCE OF THAT PAPER USING THE FOLLOWING FORMAT:

[no.] List of authors separated comma, "Title of the Paper", Name of the Journal or Conference Proceedings, year, pp 64-98 (page nos.), vol. & issue no.(if available)

Example:

[7] Thakare, Sanket, Ashwini Patil, and Ashraf Siddiqui. "The internet of things—emerging technologies, challenges and applications", International Journal of Computer Applications, 2016, pp 21-25.

IF YOUR ARE REFERRING AN INTERNET RESOURCE THEN YOU NEED TO SPECIFY THE REFERENCE OF THAT link USING THE FOLLOWING FORMAT:

[no.] http link, "Title of the Page", by author name or list of author names, updated month,day, year

Example :

[17] <https://www.investopedia.com/terms/b/blockchain.asp>, "Blockchain Explained" by Adam Hayes, Updated January, 2, 2022.

IF YOU ARE REFERRING some pages in a BOOK THEN YOU NEED TO SPECIFY THE REFERENCE OF THAT BOOK USING THE FOLLOWING FORMAT:

[no.] “ TITLE OF THE BOOK”, AUTHOR NAME OR LIST OF AUTHOR NAMES, EDITION, PUBLISHER, YEAR, ISBN No., ISSN No.(if available), page numbers referred

[no.]” Computer Systems : A Programmer’s Perspective”, Randal E. Bryant and David R. O’Hallaron, III Edition, Global Edition, Prentice Hall publisher, 2016, ISBN 10:1-292-10176-8, pages : 3, 9, 12-15, 34-67
