

Fundamental Course Information	Course Title	Introduction to Economics		Course ID		TSF1016	
				(Course Type)		Fundamental Sequence	
	(Credit/ hours per week)	3/3	Version (date)		1.0 (2024.08)		
Instructor	Professor Jose L. Tongzon; Email: j.tongzon@inha.uz Office: B402 Consultation: TBA						
Course Learning Objective	Students will learn on : 1. What is economics? 2. How consumers behave? 3. How producers make decisions? 4. What is the role of government in economy? 5. Why there are business cycles? 6. What is fiscal policy? 7. What is monetary policy? 8. How is exchange rate determined?						
Course Description	This is an introductory course to understand economic theories on demand, supply, price, profit maximization, utility maximization, national account, inflation, unemployment, business cycles, government policies on tax, and money. It will cover basic theories of microeconomics and macroeconomics.						
	NO	Details					
Course Outcomes		Understand economic behavior of consumers and producers.					
		Understand how the market system works.					
		Understand GDP, GNP, business cycles, determinants of GDP, national account and other macroeconomic concepts.					
		Understand fiscal and monetary policies and how they can affect the market economy.					
		Understand the concepts of unemployment and inflation.					
		Understand the factors and determinants of economic growth					
(Prerequisites)	[Mandatory]						
(Recommended Courses after This Course)	Microeconomics, Macroeconomics						
Course Software or Tool							
Textbook	Title	Authors		Publisher	Place	Year	ISBN
	Essentials of Economics	Paul Krugman et al.		Worth Publisher		2014	0230019285
Lecture type	Lecture, Q&A						
(Notes)	There will be discussion questions for students to answer based on previous lectures. There will be one discussion question per week starting in Week 2. These discussion questions can be found in this course outline below.						
(Evaluation Criteria)	(Attendance)	10%	(Presentation)	10%	(Participation)	10%	
	(Midterm Exam)	35%	(Final Exam)	35%	(Total)		100 %
(Methods of Evaluation)	1. Attendance and participation (20%) 2. Presentation (10%) 3. Midterm and Final Exams (70%)						

Introduction to Economics - continued

Weekly Topical Outline of Course		
(1st Week)	Topic	Introduction
	Contents	Course syllabus and introduction
(2nd Week)	Topic	What is economics? (Read Chapters 1 & 2 of your text)
	Contents	Economic Problems and tradeoffs
	Presentation Question	What is basic problem that economics is trying to solve? Describe the pros and cons of the market system as a way of solving this basic problem. Why do you think having some basic knowledge of economics is important?
(3rd Week)	Topic	Supply and Demand (Read Chapters 3 & 4 of your text)
	Contents	Excess demand, Excess Supply, Market equilibrium,
	Presentation Question	What are the factors affecting demand and supply of a product or service? Exercise 1: Solve p.101, Q1.
(4th Week)	Topic	Elasticity (Read Chapter 5 of your text)
	Contents	Elasticity of demand and supply
	Presentation Question	Why is it important for a firm to know the elasticity of demand for its product or service? Exercise 2: Solve Q14, p.176
(5th Week)	Topic	The Producer (Read Chapter 6 of your text)
	Contents	Cost, Profit Maximization
	Presentation Question	What are the various types of costs producers incur? Explain using examples.
(6th Week)	Topic	The Market Structure (Read Chapters 7 & 8 of your text)
	Contents	From Perfect Competition to Monopoly
	Presentation Question	Describe the different types of market structure and the implications of each market structure for consumers. Exercise 3: Solve pp.270-272, Q3,4 & 9.
(7th Week)	Topic	MIDTERM EXAM
	Contents	
	Presentation Question	
(8th Week)	Topic	The Role of Government (Read Chapters 9 & 10 of your text)
	Contents	Public Goods, Externality
	Homework	What make a good a public good? What is a negative externality? And Why is the government necessary to produce the public good and to deal with externalities? Exercise 4: Solve pp.302-303, Q7 & 11.

Introduction to Economics - continued

(9th Week)	Topic	What is Macroeconomics? (Read Chapter 10 of your text)
	Contents	Aggregate Demand, Aggregate Supply
	Presentation Question	What types of economic issues macroeconomics deals with? Why do we need to have a macroeconomic view of an economic issue? Under what conditions can government intervention in the market justified?
(10th Week)	Topic	National Income (Read Chapters 11 & 12 of your text)
	Contents	GNP, GDP
	Presentation Question	What is the difference between GNP and GDP? Why is it important to know them and their difference? Explain.
(11th Week)	Topic	Determination of National Income (Read Chapters 11 & 12 of your text)
	Contents	$Y = C + I + G + (X - M)$
	Presentation Question	Describe the different ways of measuring national income. Exercise 5: Solve pp.372-373, Q5,7,8.
(12th Week)	Topic	Determination of Economic Growth (read Chapter 13 of your text)
	Contents	Economic growth, determinants
	Presentation Question	What are the determinants of economic growth? Explain using specific examples of countries that have experienced high growth rates and countries that experienced low growth rates and the factors responsible.
(13th Week)	Topic	Fiscal Policy (Read Chapters 14 & 15 of your text)
	Contents	Budget Deficit, Tax Cut
	Presentation Question	What do you mean by “fiscal policy”? What are the basic instruments of fiscal policy? What are its limitations?
(14th Week)	Topic	Monetary Policy (Read Chapter 17 of your text)
	Contents	Demand for Money, Supply for Money
	Presentation Question	What do you mean by “monetary policy”? What are the basic instruments of monetary policy? What are its limitations?
(15th Week)		
	Contents	FINAL EXAM

Notes

Attendance and participation

If conducted online, class attendance is checked automatically by the eclass system at the end of the week for which a lecture is intended. If conducted offline, class attendance is checked before starting the class. If the student is not present during the attendance check he or she is considered absent. The professor should be notified by the late coming student right after the class so that he or she is not considered absent. Otherwise, he or she is still considered absent even if he or she came late. The rule for the number of absences allowed before a student will get a grade of F remains the same – 5 or more absences will be given an F.

If students are unable to attend the class due to sickness or other justifiable reasons, they should provide genuine medical certificates and other proofs to be submitted to the Academic Affairs as early as possible. As a general rule, any appeals based on medical grounds or other justifiable reasons during the grading period (Weeks 16 & 17) will not be considered.

Class participation is assessed based on students' participation during the lectures and in the presentation sessions. Class participation is used to provide interactive discussions with students based on the lectures presented and other questions that students may have regarding previous lectures. **The importance of student participation cannot be overemphasized to enhance the learning process. Due to its critical importance, students who raise insightful and relevant questions are duly rewarded.**

Group Presentation

Students are divided into groups of 5. Students are encouraged to form their own groups but in cases this is not possible, the professor will have to allocate students who don't have any groups based on professor's discretion. Presentations will commence at week 2 as can be seen in the syllabus above. Since students are graded individually, it is important that all group members are given equal shares of the total time allotted for presentation. **Every presentation should provide a power point file which has to be submitted to the professor on the day of presentation and one-page summary of the answer to the presentation question.** The total time allotted for presentation is 30 minutes followed by discussions and questions from the rest of the class. The evaluation criteria are based on the accuracy and comprehensiveness of the answers and presentations, clarity of presentations and how questions are handled and addressed during and after the presentations..

Midterm and Final Examination

These examinations will cover all materials covered in the course. Midterm exams will cover all lectures and discussions for the first half of the semester while the final exams will cover all lectures and discussions in the second half of the semester. Guidelines for the exams will be provided as we get closer to the exams. **NO MAKE-UP, LATE, OR EARLY EXAMS WILL BE GIVEN** as a general policy except in emergencies. Business-related absences (e.g.: job interview or business trip) are not excused. In addition, academic dishonesty will not be tolerated. It can result in an F in an exam or in the course. See University policy on academic dishonesty for more details.
