THE TERM PROJECT PROPOSAL DOCUMENT CONTAINS THE FOLLOWING SECTIONS:

TITLE OF THE PROJECT:

[Provide the Title here]

PROBLEM STATEMENT :

[State clearly the statement of the problem which you are going to tackle]

ABSTRACT :

[Provide a gist or executive summary of the project you are going to carry out providing all the details in brief]

INTRODUCTION

[Provide detailed introduction to the area of your term Project, discuss the use of this system in real life, motivation for carrying out this work. Give detailed description on the tasks your team is going to carry out, what features you are going to include in the project. In what way these features are useful, problems faced by the users in real life in your term project area, Indicate your plans to provide services to users to satisfy their requirements.]

OVERALL PROJECT OVERVIEW :

[Provide overall overview of your project (system you are going to design) detailing various components of this system, Identify various tasks to be performed in these components of the system at the server side and at the client(s) side looking at the system in real life and the services to be offered to the clients and all the requirements of the clients (Requirements Definition). Provide

block diagram of the complete system showing all the components both at the server side and client(s) side. Also provide block diagrams of all the subsystems (sub-components) of the main system and provide detailed descriptions of these systems]

PROJECT DESIGN AND IMPLEMENTATION:

[Discuss how you are going to design and implement different components of your system providing the details on Linux GUI (Graphical user Interface) at the Clients side, inter-process communication mechanism used (socket programming) between server and clients, backend database tool to be used, on linux platform and provide any other details in support of design and implementation of the project you will be carrying out.)

CONCLUSION:

[Provide a conclusion of your proposal by describing in what way you are going to carry out the term project, all the features you are going to implement, in what way it will be useful to the users and society]

PROJECT ACTION PLAN:

[Provide weekwise breakup of term project tasks to be performed clearly indicating specific tasks to be carried out each week and Team Members assigned to do these Tasks]

PROJECT TEAM :

[Provide all the Team member details including the Team Leader – Name, Student ID, Section No. & Signature with date]

REFERENCES :

[Provide the list of the books, library resources, websites referenced for understanding various topics required for the design and implementation of your term Project]
