

Submission Date: 13 /04/ 2025 [Sunday] (23:30 Hr)

This assignment is a Packet Tracer activity to learn how to simulate a simple network.

Activity - Carefully go through the attached file “**Assignment Question**” (this is an exercise of basic CISCO Packet Tracer course). Read the instructions and set up a network given in the document.

Important Instructions

1. Download the Packet Tracer installer.
2. Create an account at <https://www.netacad.com/> in order to make full use of tool.
3. To complete this assignment one video is provided to you, but still it is strongly recommended to enroll for short course on Packet tracer available at <https://skillsforall.com/course/getting-started-cisco-packet-tracer?courseLang=en-US>
4. Save the file (assignment) with your ID with **.pkt** extension (eg. U12345.pkt). You need to submit this file.
5. Mention your Name and ID on the workspace (as shown below)
