Part II: essay type questions, 2 points for each fully correct answer

Instructions

Dear students!

Please write clearly in the essay type questions. Also **write straight to the point**, write only what is asked. If you don't know, just leave it empty, no point for writing useless words.

Good luck!

11. The two components of professionalism are:

**expertise in a certain area,
adherence to moral guidelines**

12. The three types of actions that guide the engineers' ethics:

**Prohibited actions
Preventing harm
Promoting well-being**

13. Since engineers should serve to public good, they should hold paramount the

safety, health, and welfare of the public

14. When we think about responsibility, we can think about it as accountability too. What are the two types of accountability?

Legal and moral

15. What are the impediments (barriers) to responsibility? Write at least three of them.

(Don't explain, just write the terms)

- The problem of many hands (or fractured responsibility)
- Blind spots
 - self-deception
 - willful blindness
 - inattentional blindness
- Normalizing deviance
- Egoistic perspectives (self-interest first)
- Egocentric perspectives (assuming others see matters as we do)
- Microscopic vision (seeing fine details, but missing the bigger picture)
- Uncritical deference to authority
- Groupthink
 - illusion of invulnerability of group
 - shared stereotypes
 - rationalizations
 - illusion of morality
 - self-censorship
 - illusion of unanimity
 - direct pressure to agree
 - mind-guarding (keeping dissenters away from the group)

16. Organization needs certain amount of computers. Madina is a senior developer of IT team at this organization. She was tasked to choose the supplier. She finalized two companies that offer comparable features and qualities. One company offered cheaper prices but a longer delivery time. The second one offered higher prices, but a faster delivery period. How Madina should make the decision?

Since the issues are management issues, she does not make the decision, but the manager does (proper management decision)

17. What are the two justification views to whistleblowing?

A Harm-Preventing Justification

A Complicity-Avoiding View

18. What are the four forms of dishonesty?

Lying

Deliberate deception, but without lying

Withholding expected information

Failure to seek out the truth

19. What is the relationship between dishonesty and respect for persons approach?

Engineers should treat other stakeholders as moral agents, dishonesty goes against it

or

Engineers have responsibility to ensure that employers, clients, and the general public can make autonomous decisions with understanding, particularly understanding of their consequences, dishonesty goes against it

20. What are the most common four types of dishonesty in science and engineering?

(I count any four of them as correct answer)

Falsification of data

Fabrication of data

Failure to respect intellectual property of others

Plagiarism

Inappropriate attribution of authorship
