

A dark gray L-shaped frame composed of two thick lines. One line runs vertically down the left side, and the other runs horizontally across the top, meeting at a right angle in the upper-left corner. Another L-shaped line runs vertically down the right side and horizontally across the bottom, meeting at a right angle in the lower-right corner.

TRUST AND RELIABILITY

Bobir Muratov

Case

Introduction

- Society has become dependent on professionals whose knowledge and expertise are not widely shared or understood
- “knowledge explosion”
- “ignorance explosion”

Honesty

- Honesty is a virtue
- Engineers are required:
 - “to be honest and realistic in stating claims or estimates based on available data.”
 - “to seek, accept, and offer honest criticism of technical work.”

Forms Of Dishonesty

■ Lying

- A lie ordinarily involves something that is believed by the liar to be false or seriously misleading
- A lie is ordinarily stated in words
- A lie is made with the intention to deceive

Forms Of Dishonesty

- Deliberate Deception
- Withholding Information:
 - if one fails to convey information that the audience would reasonably expect would not be omitted
 - if the intent of the omission is to deceive
- Failure to Seek Out the Truth

Why is Dishonesty Wrong?

Why is Dishonesty Wrong?

- Honesty as a Virtue:
- Norm Lewis case
- Is maintaining academic trustworthiness in some areas is more important than in others?

Why is Dishonesty Wrong?

- Dishonesty and Respect for Persons
- Moral agents
- Engineers have responsibility to ensure that employers, clients, and the general public can make autonomous decisions with understanding, particularly understanding of their consequences

Why is Dishonesty Wrong?

- **Utilitarian Considerations**

- Engineering contributes to utilitarian goals and informed decision-making

- **Trust and Truthfulness**

- “Whatever matters to human beings, trust is the atmosphere in which it thrives”

Dishonesty on Campus

- Problems for engineering students regarding honesty in engineering can arise even before completing their undergraduate work
- Case: would you report your friend's mistake?
- Case: capstone project
