

Assignment 2

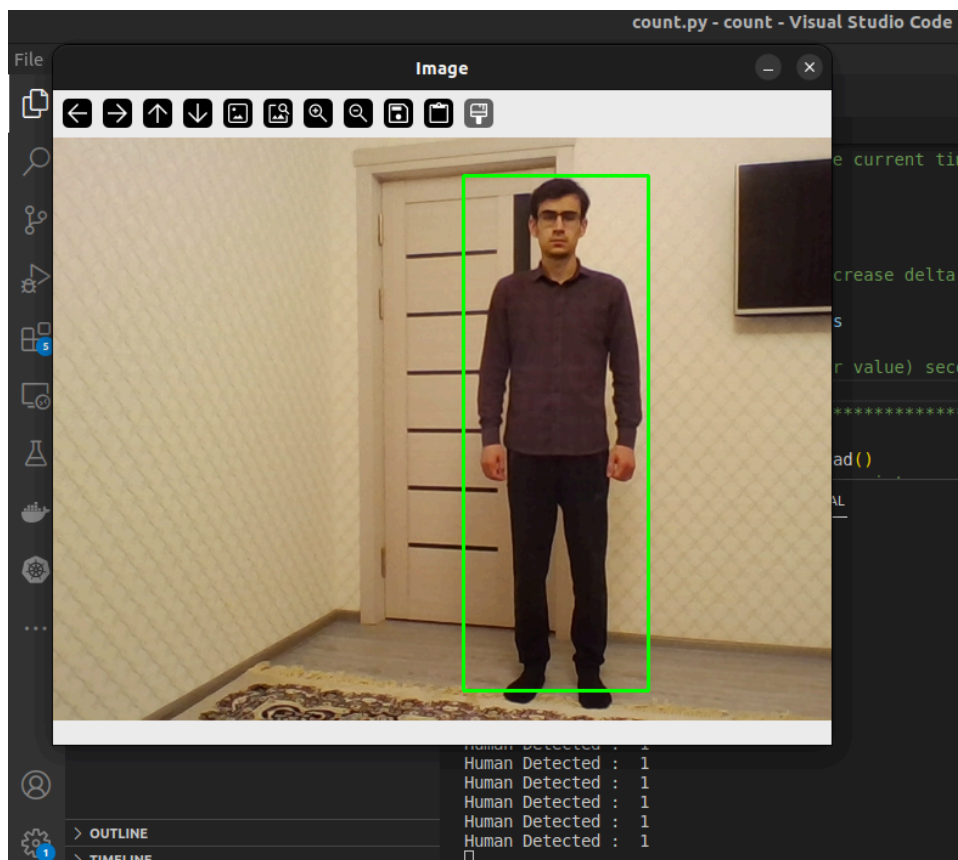

In this assignment, we will use our remote phone's camera to count the number of people in a room.

Task Description.

Access phone's camera with python

Count the number of humans in the video captured by your phone's camera.

You should get a result like this where both captured video with humans and the count results are shown.

CODE

Comment important lines, functions in your code correspondingly with its function.

E.g.

```

camera.py > ...
1  import cv2
2
3  url = "http://192.168.100.63:8080/video"
4
5  ##### Begin capturing video
6  # from the specified address of my phone
7  cap = cv2.VideoCapture(url)
8

```

You must have at least two comments

- For video capture code snippet
- For human detection and count code snippet

What to submit

One code file together with a screenshot and a requirements.txt file.

Name your code file same as your student ID e.g. U1810021.py

Name your screenshot in the same way as well, e.g. U1810021.png

Zip them together and name that zip as your ID.

Grading Criteria

	Video capture & count human code	3
	Code pointed out with comment	2
	Result screenshot	5
Not following naming conventions for files, wrong submission format, etc.		-3
Max		10

WARNING!!!

NO LATE submissions allowed - Eclass assignment submission settings have been set not to accept after the deadline.

Same screenshot or any other elements of cheating found in your submission -> zero.
